"I have examined it with considerable care, and am very much pleased with it. It is a handy book for reference, and so far as I have examined it, it is accurate in every particular."—*E. H. Bartley, Prof. of Chemistry, Long Island College Hospital, Brooklyn.*

"I consider this the dictionary of all others for the medical student, and shall see that it is placed on our list of text-books."—*A. R. Thomas, M.D., Dean Hahnemann Medical College, Philadelphia.*

"I have given your 'New Medical Dictionary' a critical examination. Its size has made it convenient to the study table and handy for frequent use. At the same time it is comprehensive as to the number of words, including those of the latest coinage, and concise in its definitions. The etymology and accentuation materially enhance its value, and help to make it worthy a place with the classical books of reference for medical students."—*J. W. Holland, M.D., Dean Jefferson Medical College, Philadelphia.*

Students will find this an extremely useful book of reference. The anatomical tables will be of great use in memorizing the arteries, muscles, etc.

## PREFACE TO THIRD EDITION.

In preparing a third edition of the Compend of Chemistry, I have endeavored simply to bring the book up to date, as far as concerns the general applications of Chemistry to Medicine and Dentistry. More space has been given to explanations of the nature and functions of acids and radicles, and the organic substitution compounds have been treated more at length. The general arrangement and classification agree essentially with that of the former edition.

Books of this class do not always meet with favor at the hands of reviewers; but any one who has had experience in teaching at American Medical Colleges knows that as long as the present methods continue some such assistance is absolutely essential. It affords to the student an opportunity to keep up with the lectures, and obviates the necessity of taking voluminous notes, in which serious errors are liable to occur. Such books, of course, cannot claim any originality; their merit lies in their accuracy, perspicuity and judicious selection of facts.

I am indebted to Mr. WILLIAM BEAM, for aid in the preparation of the work.
