"As this life is a preparation for eternity, so is Education
a preparation for this life; and that Education alone is
valuable which answers these great primary objects."

BISHOP SHORT.

PREFACE.

THE following treatise is introductory to a larger and more comprehensive work upon the same subject, now in the course of preparation. Though very much that is valuable has already been written respecting Education, there still is abundant room for thought and action in this important sphere. Notwithstanding the efforts that have been made to remove obstacles from the pathway of the teacher, there are yet many difficulties which impede his progress and detract from the success of his exertions. It is the author's object in this essay to suggest means by which some of these difficulties may be overcome; and if any of his suggestions shall be found profitable, in however small a degree, to any of those to whom the education of the young is entrusted, he will be most amply rewarded for his labour.
