N O T E.

WHILE engaged in the preparation of a General Gazetteer which has lately been published, I repeatedly felt the want of an Index to the contents of those volumes succeeding the Tenth of the Journal of the Royal Geographical Society; and believing that other inquirers might experience similar inconvenience, I resolved to present to the Fellows of the Society an Index to the Second Ten Volumes of their Journal. The following pages are the result of that determination. I have introduced into the Alphabetical List, references to the principal subjects treated of in the Anniversary Addresses; but with this exception, I have ventured on no material deviation from the plan of the Index to the First Ten Volumes of the Journal, which, in so far as I could perceive, during a very frequent recourse to it for several years, leaves little to be desired in a summary of its kind.

G. S. BRENT.

London, 1853.
