THE AUTHOR.

# CONTENTS.

	PAGE
HÆMATURIA, as a Symptom of Diseases of the Genito-Urinary Organs—Its Origin and Treatment, . . . . .	9

## CHAPTER I.

### DISEASES OF THE URETHRA.

Polypoid growth of the Urethra—Vascular Tumors of the Urethra—Cancer of the Urethra—Stricture—Cases reported—Treatment of Stricture, . . . . .	9
--	---

## CHAPTER II.

### DISEASES OF PROSTATE GLAND.

Congestion—Cases reported—Treatment of Congestion—Ulcer of Prostate—Tubercle of Prostate—Calculus of the Prostate—Cancer of the Prostate—Injuries of the Prostate, . . . . .	18
--	----

## CHAPTER III.

### DISEASES OF THE BLADDER.

Varix and Hemorrhoids of the Bladder—Villous Tumors—Carcinoma—Calculus—Parasitic Disease—Ulcer, . . . . .	27
---	----

## CHAPTER IV.

## INJURIES OF THE BLADDER.

	PAGE
Punctured and Gunshot Wounds—Case reported—Rupture of Bladder, partial and complete—Cases reported— New Treatment of Rupture, . . . . .	26

## CHAPTER V.

## RENAL DISEASE.

Injuries of Kidney—Calculus—Acute Bright's Disease— Tubercle—Malignant Disease—Malarial Hæmaturia —General Remarks on the Diagnosis of the Origin of Hæmaturia, . . . . .	46
--	----

## P R E F A C E.

---

MANY times while engaged in the arduous duties of my profession, I have felt the need of consulting some authority, concise, practical, and reliable.

It is on this account, I have concluded to publish this memoir, believing that it will meet the wants of the physician and genito-urinary surgeon in practice far better than many of the more voluminous works, written by theorists and specialists, without due regard to the practical necessities of the physician, who is already burdened and worn down with the cares of a large practice, and has but little time for reading.

I have selected this subject because it is one in which I have always taken great interest, and the facilities which I have had during a period of fifteen years of observation in hospital, military and civil practice, have afforded me more experience than is enjoyed by most practitioners. There is no class of diseases with which I am acquainted less understood by the profession, or which causes greater anxiety to the patient, and which if properly and early treated is attended with more satisfactory results, than the diseases of the genito-urinary organs.
