**THE MIND OF MAN: BEING  
A NATURAL SYSTEM OF  
MENTAL PHILOSOPHY**

A NATURAL SYSTEM  
OF  
MENTAL PHILOSOPHY.

Alfred Russel Wallace

THE MIND OF MAN:  
BEING  
A NATURAL SYSTEM  
OF  
MENTAL PHILOSOPHY.

BY

ALFRED SMEE, F.R.S.

FELLOW OF THE ROYAL COLLEGE OF SURGEONS OF ENGLAND, FELLOW OF THE CHEMICAL SOCIETY,  
FELLOW OF THE LITERARY SOCIETY, MEMBER OF THE ROYAL INSTITUTION,  
MEDICAL OFFICER TO THE BANK OF ENGLAND, &c. &c.

'Learn me true understanding and knowledge.'—Ps. cxix. 66.

Illustrated with Engravings.

LONDON:  
GEORGE BELL AND SONS,  
YORK STREET, COVENT GARDEN.

1875.

## LIST OF ILLUSTRATIONS.

FIG.	PAGE
1 Rectangular square, divided into nine squares .. .. .	3
2 Rectangular square, divided into 100 squares, to mark the retina .. .. .	4
3 Representation of an inner court of the Bank of England, copied from a photograph which was made by subjecting the plate one half the time required at one station, and the other half the time at a second station, two and a half inches from the first, whereby two pictures were formed exactly blended together, as man sees a picture with both eyes in nature .. .. . <i>opposite</i>	5
4 Nest of <i>Ploceus pensilis</i> .. .. .	18
5 Bowerbank's wasp's nest, illustrative of the effect of instinct .. .. .	18
5* Diagram of the powers of man at different ages .. .. . <i>opposite</i>	34
6 Acarus of Cross .. .. .	51
7 Acarus of Weeks .. .. .	51
8 Relational machine, one half closed, the other half open. By mistake one reading has been figured in error, but it was immediately detached on the next casual inspection. The readings used are the logical terms, <i>a</i> , all; <i>n</i> , none; <i>s</i> , some .. .. .	94
9 Differential machine;—A, the magnitude used for the definition of one statement on one side, and the similarity on the second; B, the magnitude used for either side, when the matter is unknown; C, the magnitude when the second differs from the first statement .. .. .	100
10 Diagram of the action of religion in particular instances, and the deduction of general laws for particular instances .. .. .	107
11 Single voltaic circuit .. .. .	211
12 Double voltaic circuit .. .. .	211

FIG.	PAGE
13 Single nervo-voltaic circuit .. .. .	211
14 Triple nervo-voltaic circuit .. .. .	212
15 Three nerves with their combinations .. .. .	212
16 Theoretical nervous combination of lower animals .. .. .	213
17 Theoretical nervous combination of man .. .. .	213
18 No. 1—Anatomy of the fibres of the brain, after Mayo. A, the spinal chord; <i>f</i> , posterior columns of spinal chord, into which the sensor nerves are implanted, and which are continued into the cerebellum, B. From the cerebellum fibres are continued to the corpora quadrigemina, <i>k l</i> . Other fibres are continued from the spinal chord through the olivary bodies, <i>c</i> , by the olivary fasciculus, <i>h</i> , which are continued to the cerebrum, <i>c c c</i> . From the cerebrum fibres converge to the pons, <i>n</i> , and from this point the fibres of the anterior fasciculus of the spinal chord spring, <i>d</i> , from which bundles the motor nerves arise (half diameter). No. 2—The ultimate vesicles of the brain, with nerve-tubes placed in the grey matter amongst the blood-vessels (highly magnified). No. 3—Ultimate structure of nerve-fibre (highly magnified) .. .. .	214
19 Brain of man, showing the convolutions of the cerebrum overlapping the cerebellum .. .. .	216
20 Brain of dog, showing how the cerebellum can be seen projecting beyond the cerebrum. This is a general peculiarity of animals, though it has been disputed whether in the single case of a monkey the cerebellum has not been completely covered .. .. .	216
21 Nervous system of star-fish .. .. .	217
22 Side view of brain of cat, to illustrate Professor Ferrier's researches. A, crucial sulcus dividing anterior convolutions; B, fissure of Sylvius; C, olfactory bulb .. .. .	217
23 Side view of brain of dog. A, crucial sulcus; B, fissure of Sylvius; C, olfactory bulb .. .. .	219
24 Upper surface of brain of rabbit. A, cerebrum; B, cerebellum; C, olfactory bulb .. .. .	220
25 Plexus of nerves from the spinal marrow, after Stricker. <i>a</i> , Nerve tube communicating with plexus .. .. .	221
26 Cerebellum, showing the blood-vessels on the right-hand side descending vertically into the grey matter, and on the left the nerve-cells with nerve-fibres diverging from them, by Dr. Stewart .. .. .	223

## LIST OF ILLUSTRATIONS.

XIX

FIG.		PAGE
27	Ultimate nerve-fibres of the sympathetic nerve (highly magnified) .. .. .	224
28	Terminations of the nerve of the retina, showing the rods and cones, after Stricker .. .. .	224
29	General view of the layers of retina of man. 1, Membrana limitans interna. 2, Optic fibre layer. 3, Ganglia cell layer. 4, Internal granulated layer. 5, Internal granule layer. 6, External granulated layer. 7, External granule layer. 8, Membrana limitans externa. 9, Layer of rods and cones. 10, Pigment layer .. .. .	225
30	Termination of the nerves of the skin. The spinal vessels are shown running from the perspiratory ducts. The nerve is depicted passing to the papilla, also delicate plexus of nerves between the papilla is shown, drawn by Dr. Stewart .. .. .	226
31	Termination of the auditory nerve. 1, Cartilage of the wall of the ampulla. 2, Structureless basement membrane. 3, Doubly continued nerve-fibre. 4, Axis cylinder traversing the basement membrane. 5, Plexiform union of nerve-fibres with interspersed nuclei. 6, Fusiform cells with nucleus and dark fibre in their interior. 7, Supporting cells. 8, Auditory hairs (highly magnified) .. .. .	227
32	Termination of the gustatory nerve of the frog, magnified 600 diameters .. .. .	228
33	Terminations of olfactory nerve. <i>A, a</i> , Epithelial cells from the olfactory region of the proteus; <i>d</i> , the processes apparently connected with them; <i>e</i> , olfactory cells; <i>B</i> , epithelium and olfactory cells from Max Schultze .. .. .	228
34	Distribution of nerves on muscle, after Stricker. <i>A</i> , seen in profile; <i>p p</i> , terminal nerve plate: <i>s s</i> , support of the plate with nuclei. <i>B</i> , the same in fresh muscle. <i>C</i> , the same after death .. .. .	229
35	Artificial muscle, which distends in breadth, and contracts in length .. .. .	229
36	Artificial blood corpuscule .. .. .	229
37	Arteries and veins of the choroid coat of the eye .. .. .	230
38	Yellow spot of Sömmerring, the centre of perfect vision .. .. .	230
39	Artery of the retina, from my own preparation .. .. .	230
40	Blood-vessels of internal ear, from my own preparation .. .. .	231
41	Blood-vessels of the nose, from my own preparation .. .. .	231
42	Blood-vessels of the tongue, from my own preparation .. .. .	231
