PREFACE

I TAKE this opportunity of acknowledging my indebtedness to my associate, Dr. W. E. Lower, who rendered most valuable assistance in both the experimental and the clinical parts of this work, to whom much of the credit for what merit this volume may have is due. My thanks are rendered my former assistant, Dr. Guy H. Fitzgerald, for making the histologic studies of the arteries and of the spinal cord, as well as rendering other assistance in the experimental research. I also thank my assistant, Dr. A. Cudell, for valuable assistance in the laboratory.
