## SUMMARY OF CONTENTS.

|                                                                                                                                                                      | PAGE  |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Evolution and Involution got hold of in nature, . . . .                                                                                                              | 1-3   |
| Evolution and Involution inseparable, . . . . .                                                                                                                      | 3     |
| Involution overlooked by Mr. Darwin and his associates, . .                                                                                                          | 3     |
| Development erroneously taken for Evolution, . . . .                                                                                                                 | 4-9   |
| Man a typical unit possessing limits of potentiality, . . .                                                                                                          | 4-9   |
| The summit of modern mind has not anything to match<br>with the summit of mind in the past, . . . . .                                                                | 4-9   |
| Mr. Matthew Arnold on God, . . . . .                                                                                                                                 | 4     |
| If Supernaturalism is thrown aside, Naturalism of mind in<br>the past being higher than in the present, would<br>militate against the theory of Evolution, . . . . . | 5-6   |
| What man is now, whatever he may have been in the past,                                                                                                              | 6-7   |
| What Mr. Darwin has done for the human family, . . . .                                                                                                               | 7     |
| Range of Development, . . . . .                                                                                                                                      | 8-9   |
| What the Law of Evolution and Involution enables man to do,                                                                                                          | 9     |
| What the Law of Evolution and Involution is, . . . . .                                                                                                               | 9     |
| What is Personality, . . . . .                                                                                                                                       | 9-15  |
| Man not a Personality proper, . . . . .                                                                                                                              | 9-15  |
| The two kinds of the limitation of Personality, . . . . .                                                                                                            | 11-15 |
| Man has an instinctive idea of undeveloped completeness in<br>his Personality, . . . . .                                                                             | 12-15 |
| Tennyson on our incompleteness of development, . . . .                                                                                                               | 14    |
| The child's idea of Personality, . . . . .                                                                                                                           | 15    |
| Existence and Being only explainable in Personality, . .                                                                                                             | 15-19 |
| Mr. Herbert Spencer on the "unthinkable" and "un-<br>knowable," . . . . .                                                                                            | 16-19 |
| All the scientific men of this age have failed to mark the<br>distinction between the knowledge of Idea and the<br>knowledge of Reality, . . . . .                   | 19-31 |

|                                                                                                                                                                                 | PAGE  |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| Mr. Spencer, Mr. Darwin, and the authors of <i>The Unseen Universe</i> , examined on the knowledge of Idea and the knowledge of Reality, . . . . .                              | 19-27 |
| Messrs. Darwin, Haeckel, Spencer, Huxley, Comte, etc., <i>versus</i> our ancient faiths, . . . . .                                                                              | 26-27 |
| The great value of the works of Messrs. Comte, Darwin, Haeckel, Spencer, and Huxley, . . . . .                                                                                  | 27    |
| Of their shortcomings, . . . . .                                                                                                                                                | 28    |
| Jesus of Nazareth's appreciation of the beauties of external nature, . . . . .                                                                                                  | 29    |
| What is Objectivity and Subjectivity, . . . . .                                                                                                                                 | 19-31 |
| Man's kind of knowledge, . . . . .                                                                                                                                              | 19-31 |
| Existence and Being fully explained in Personality, . . . . .                                                                                                                   | 31-53 |
| All the higher races of mankind have associated Existence and Being with Personality, . . . . .                                                                                 | 31    |
| Anthropomorphism, . . . . .                                                                                                                                                     | 32    |
| Huxley on "the physical basis of life," . . . . .                                                                                                                               | 33-35 |
| Mansel and Strauss on Absolute Personality, . . . . .                                                                                                                           | 36    |
| What man's absolute idea is adequate to, . . . . .                                                                                                                              | 36-38 |
| The best solution of existence in the possession of man, . . . . .                                                                                                              | 39-41 |
| All the attributes that characterise Personality are developed simultaneously, . . . . .                                                                                        | 41-43 |
| Whence does man get the idea of an Absolute Personality, . . . . .                                                                                                              | 43    |
| Man has just the same kind of knowledge of God that he has of a flower, or of a man—that is, he has not complete knowledge of either, but he has an idea of them all, . . . . . | 44-49 |
| God in relation to the universe, . . . . .                                                                                                                                      | 48-49 |
| Anthropomorphic absolutism and the "boundless universe," . . . . .                                                                                                              | 49-50 |
| God in relation to the universe, . . . . .                                                                                                                                      | 50-53 |
| All forms and beings in nature, in virtue of their environment and their typical individuality, are self-creating, . . . . .                                                    | 53-69 |
| Nature as it assumes life imparts life, . . . . .                                                                                                                               | 53-69 |
| Nature has different fashions of giving life, . . . . .                                                                                                                         | 53-69 |
| Man the creator of the universe, . . . . .                                                                                                                                      | 53-69 |
| Man unconscious of this extraordinary power, . . . . .                                                                                                                          | 58-69 |
| What is Art, Science, and Philosophy, . . . . .                                                                                                                                 | 67-68 |
| Man's sphere in the universe, . . . . .                                                                                                                                         | 67-72 |

*SUMMARY OF CONTENTS.*

|                                                                                                                                                                                                                                         | PAGE    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Of the origin and foundations of Moral Science, of Religion, of Freedom and Responsibility, of Good and Evil, of the capacity to commit sin, . . . . .                                                                                  | 72-186  |
| The isolation of a pebble, . . . . .                                                                                                                                                                                                    | 72      |
| The extent to which a flower makes itself one with existence, . . . . .                                                                                                                                                                 | 73      |
| The extent to which a lower animal makes itself one with existence, and how far, in this respect, they are in common with man, . . . . .                                                                                                | 74-82   |
| The lower animal's sphere in the universe and man's sphere in the universe contrasted, . . . . .                                                                                                                                        | 82-83   |
| Man's extraordinary efforts to idealise the universe both in the practical and in the understanding, . . . . .                                                                                                                          | 83-97   |
| Mr. Carlyle's satire on the practical and the utilitarian idealising of the universe too severe, . . . . .                                                                                                                              | 84      |
| The ancient Greek stands pre-eminently distinct at the head of the nations of the earth in the development of Idea, . . . . .                                                                                                           | 84-85   |
| The extraordinary range and capacity of the development of Idea, . . . . .                                                                                                                                                              | 85-86   |
| The significance of idealising the universe in the understanding, . . . . .                                                                                                                                                             | 86-97   |
| What constitutes Species, . . . . .                                                                                                                                                                                                     | 86-88   |
| Man's world, . . . . .                                                                                                                                                                                                                  | 88      |
| The Hindoo, Greek, and Jew stand pre-eminent in idealising the universe in the understanding, . . . . .                                                                                                                                 | 89-90   |
| The complete idealiser of the universe in the understanding, . . . . .                                                                                                                                                                  | 90-91   |
| Comte's religion of Humanity, . . . . .                                                                                                                                                                                                 | 95      |
| Sir William Hamilton as a philosopher, . . . . .                                                                                                                                                                                        | 96      |
| Space, Time, Existence, Number, and Form are only things of an imperfect creature like man, for the perfect side of nature knows them not, . . . . .                                                                                    | 97-110  |
| The import of the utilitarian and of the non-utilitarian idealising of the universe contrasted, or the import of the practical idealising of the universe and of the idealising the universe in the understanding contrasted, . . . . . | 110-112 |
| What is Moral Science? . . . . .                                                                                                                                                                                                        | 112-186 |
| On the intuitive and empirical in Morals, and on the innate and empirical in Cognitions, . . . . .                                                                                                                                      | 113-116 |

|                                                                                                                                                                                                                                    | PAGE    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| The old answer to the question, What is Moral Science ?<br>examined, . . . . .                                                                                                                                                     | 116     |
| The author's answer to the question, What is Moral<br>Science? . . . . .                                                                                                                                                           | 117-120 |
| What enables man to form a Moral Science ? . . . . .                                                                                                                                                                               | 120-124 |
| Moral Science and all Cognitions are at once innate and<br>empirical—so much innate that any truth whatsoever<br>is incommunicable ; and they are empirical while man<br>continues to be born and to arrive at maturity, . . . . . | 124-126 |
| Tyndall on Creation, . . . . .                                                                                                                                                                                                     | 127     |
| What is implied in procreation or propagation of the typical<br>man, . . . . .                                                                                                                                                     | 128     |
| The proposition that contains man's history and destiny in<br>this world, . . . . .                                                                                                                                                | 128-129 |
| What is Evil, . . . . .                                                                                                                                                                                                            | 130-131 |
| Practical Morality, whereon founded, . . . . .                                                                                                                                                                                     | 131     |
| "The meek shall inherit the earth," and "the survival of<br>the fittest" contrasted, . . . . .                                                                                                                                     | 136-137 |
| What has made England great, . . . . .                                                                                                                                                                                             | 137     |
| Utilitarianism, . . . . .                                                                                                                                                                                                          | 139     |
| Is Morality only a thing of Idea ? . . . . .                                                                                                                                                                                       | 144     |
| The age of the universe, . . . . .                                                                                                                                                                                                 | 148     |
| How those must walk who would be happy, . . . . .                                                                                                                                                                                  | 149-150 |
| Man's idea of God, . . . . .                                                                                                                                                                                                       | 151-152 |
| Where man and the lower animals completely part company,<br>What constitutes man's Religion, . . . . .                                                                                                                             | 152-154 |
| Hume's idea of Miracle examined, . . . . .                                                                                                                                                                                         | 154-159 |
| Prayer and Miracle's liability to abuse, . . . . .                                                                                                                                                                                 | 159-161 |
| Man has the capacity of performing miracle of a kind, . . . . .                                                                                                                                                                    | 161-163 |
| The mystery of mysteries in the unity of nature, . . . . .                                                                                                                                                                         | 163-167 |
| Why we die, . . . . .                                                                                                                                                                                                              | 167     |
| Morality looked at in its more practical bearings, . . . . .                                                                                                                                                                       | 168-169 |
| What enables man to commit sin, . . . . .                                                                                                                                                                                          | 169-170 |
| What is meant morally by the established laws of nature, . . . . .                                                                                                                                                                 | 170     |
| The most complete and certainly the most refined and<br>beautiful moral education in the whole range of nature, . . . . .                                                                                                          | 171     |
| A higher morality than the practical, . . . . .                                                                                                                                                                                    | 171-174 |
| The capacity to commit moral evil more an acquired thing<br>than a disposition, . . . . .                                                                                                                                          | 174-177 |

*SUMMARY OF CONTENTS.*

|                                                                                                                                                        | PAGE    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| It is not an improbable thing that man has yet something to learn as to what is Morality, . . . . .                                                    | 178-184 |
| A few words on Freedom and Responsibility, . . . . .                                                                                                   | 184-186 |
| The strange delusion in the belief that the world is older than any man's self, . . . . .                                                              | 186-187 |
| Man must have some foundation for such a belief, . . . . .                                                                                             | 187     |
| Hume circumscribes belief to experience, making experience the final and infallible test as a foundation for any belief, . . . . .                     | 187-188 |
| On what and by what does a man found the belief that the world is older than himself, . . . . .                                                        | 188-189 |
| Is this belief legitimate, and are the data that furnish it authoritative? . . . . .                                                                   | 189-191 |
| Is belief in after or future existence legitimate and natural? . . . . .                                                                               | 191-192 |
| The range of experience, when looked at narrowly, very limited indeed; but the absolute idea or reason in man, perfect and complete as such, . . . . . | 192-198 |
| Would-be men of science, . . . . .                                                                                                                     | 196-198 |
| Science, Metaphysics, and Theology have the same foundations, . . . . .                                                                                | 198     |
| The only solution of Existence and Being that is natural and possible to man, . . . . .                                                                | 199-200 |
| That wherein even present existence has its foundation, . . . . .                                                                                      | 200-201 |
| The great significance of being unconsciously in sleep, . . . . .                                                                                      | 201     |
| Two foolish arguments in favour of annihilation, . . . . .                                                                                             | 201-202 |
| What is the Universe? . . . . .                                                                                                                        | 203-205 |
