PREFACE.

To our Farm-Servants.

DEAR FRIENDS—The Talks with you in this little book were first given in the Parish Magazine—"Life and Work." I have been made very thankful indeed by the warm welcome they have received from you and from all classes of the community.

In many quarters a desire has been manifested that these Talks should be published in some such form as this. So, in response to that desire, here they are, dedicated to God and to you, with the earnest wish and prayer that they may do something to help you to make the best of yourselves and the best of both worlds.

AN OLD FARM-SERVANT.

December 1882.

Figure 1. Percentage of the population aged 65 and over, 1950-2050.

and the United States.

Figure 1 shows that the percentage of the population aged 65 and over is projected to increase significantly for all countries shown. Japan shows the most rapid increase, starting at approximately 7% in 1950 and reaching about 28% by 2050. The United States shows the slowest increase, starting at approximately 10% in 1950 and reaching about 20% by 2050.

Figure 2 shows the projected percentage of the population aged 65 and over for each country from 1950 to 2050.

Figure 2 shows that the percentage of the population aged 65 and over is projected to increase significantly for all countries shown. Japan shows the most rapid increase, starting at approximately 7% in 1950 and reaching about 28% by 2050. The United States shows the slowest increase, starting at approximately 10% in 1950 and reaching about 20% by 2050.

Figure 3 shows the projected percentage of the population aged 65 and over for each country from 1950 to 2050.

Figure 3 shows that the percentage of the population aged 65 and over is projected to increase significantly for all countries shown.
