To
THE STUDENTS
OF THE
MEDICAL DEPARTMENT OF THE UNIVERSITY OF THE
CITY OF NEW YORK,

THIS MANUAL ON VENEREAL DISEASES

Is Inscribed,

BY THEIR OBLIGED FRIEND AND TEACHER,

THE AUTHOR.

Figure 1: A 3D scatter plot showing the distribution of 1000 simulated data points in a 3D space defined by axes X, Y, and Z. The points are clustered in a roughly spherical shape centered around the origin, with a radius of approximately 1.5 units. The axes range from -2 to 2. The plot includes a grid and a legend indicating the data points are represented by small black dots.

PREFACE.

It has been said, with much truth, that books are read in inverse proportion to their length, and in preparing this Manual I have steadily kept the question of length in view.

Written for students of medicine, it has been my aim to make the book concise, and at the same time practical. I have, therefore, as far as possible, eschewed all mooted points in Venereal medicine, and confine myself to giving a careful, and at the same time condensed, description of the commoner forms of Venereal diseases which will fall to the lot of the average young practitioner to treat, together with the most appropriate remedies.

How well I have accomplished my task remains for others than myself to say. I trust, however, that it will satisfy a want which, from my experience as a lecturer in this branch, I know exists, and with this hope I send the little Manual into the world to take its chances.

16 WEST THIRTY-SECOND STREET,
NEW YORK CITY.

CONTENTS.

	PAGE
LECTURE I.	
SIMPLE VENEREAL ULCER AND ITS COMPLICATIONS—THE CHANCROID,	1
