Profession of the German Language and Literature in Cornell University.

BOSTON : D. C. HEATH & CO., PUBLISHERS, ` 1891.

PREFACE.

In making the following selections from Heine's verse, the editor was guided by the desire to present to the reader only those poems to which one might wish or be willing to recur. The complete works of Heine are readily accessible ; and a number of specimens have therefore been omitted here which would have been merely characteristic of certain phases of Heine's genius when the poet apparently was working without a reason or an aim. Specimens, containing an undue mixture in the true Lucretian sense of the amari aliquid, of unsanctified wit, and marked by a reckless and conscienceless if not blasphemous irresponsibility. Heine's writings suffered greatly from a hostile censorship during his They have suffered more from the lack of a lifetime. friendly censorship since his death. But one must judge him by the best which he has written as well as by the worst, and for the omission of specimens of the latter surely little apology is needed. It is boped that a sufficient variety has yet been included to indicate fairly the peculiar powers and passions of the poet, the fine quality of his pellucid (iii)

style, his mastery of rippling versification, his conscious and unconscicus echoings of the traits and themes of the popular ballad, his varied portrayals of the pangs of despised love, and all the fancied joy and woe of lovers, his delicate and picturesque interweaving of the life of nature with the life of man in mutual suggestiveness, his eloquent pictures of the sea in storm and calm, - no common refrain in German song, - his uncontrolled and harlequin witticisms, his chronic cynicism and wanton travesties of sentiment, his quick and merciless perception of the unlovely foibles and ludicrous weaknesses of his nation and his race, his stinging innuendocs against the decadent aristocracy of the old régime, his genuine though ineffective devotion to his land, and to Israel too, his hatred of their arbitrary oppressors, his heedlessly patriotic utterances, alternating with the jingling of the jester's bells, and the final flickering dirges of his valiant but unavailing struggle with disease and death.

It is easier to be generous to Heine than to be just; for justice to so inconsistent a personality would require the most painful counter-balancing of opposing qualities. Everywhere in his poetry we trace the continual conflict of the impulse toward a high and serious purpose with the stronger impulse to deride and to deny. In him the noble gift of poetic expression was entrusted to unworthy and even frivolous hands. His was a life without a moral centre; and in the midst of his most moving utterances one must

ever question his absolute sincerity. But despite all halfindignant doubts, his lyrics still beguile the unwary heart, and his airy mockery charms and entertains. Nor can we refuse to recognize in his political stanzas the voice of a lover of his country, uplifted in behalf of greater civil as well as greater intellectual liberty.
