## BENNETT'S LATIN GRAMMAR

## PREFACE.

---

My purpose in the following pages has been to give such suggestions concerning the sounds, inflections, and syntax of the Latin language, as experience has shown are likely to prove of service to teachers and advanced students. In the former part of the work I have drawn freely upon the standard manuals of Seelmann, Brugmann, Stolz, and Lindsay; in the syntax I wish to acknowledge my indebtedness not only to Delbrück's recently published *Vergleichende Syntax*, but especially, for the moods, to the syntactical studies of Professor W. G. Hale, of the University of Chicago.

In marking the quantities of hidden vowels, I have deviated from the principle followed in my *Latin Grammar*, and have departed from Lewis's *Dictionaries* in those cases where the evidence seemed to demand this.

For the kind criticism of friends who have read my manuscript and have followed the book through the press, I desire here to extend my thanks, especially to Professors H. C. Elmer and George P. Bristol of Cornell University, Professors George Hempl, Francis W. Kelsey, and John C. Rolfe, of the University of Michigan, and Professor Alfred Gudeman, of the University of Pennsylvania. The chapter on Relative Clauses is the work of Professor Elmer.
