## A FOREWORD

This little book differs from other dramatic readers in one respect. It contains stories in narrative as well as in dramatic form, in order to offer opportunity for original dramatization. The development of spontaneity and the enrichment of vocabulary are believed to be gained in a far greater degree by original dramatizing than by enacting scenes completely arranged by another. Narrative stories are introduced into this volume, therefore, to supply suitable literary material to be dramatized by the little readers for whom this book is intended.
