COOPER'S
Sheep Dipping Powder

Used most because it **PAYS BEST.**

The Sale of "COOPER" during the early days of Queen Victoria was sufficient to dip 200,000 sheep annually. In King George's reign the sale of Cooper is sufficient to dip over 260 millions sheep annually.

What better proof of the Superiority of "COOPER?"

Cooper's Dip is the Original Powder Dip
OTHERS ARE BUT IMITATIONS.

Some of the imitations are better than others, but none are equal to the original.

COOPER affords the most lasting protection to sheep against parasites. The particular method of manufacture makes it "stick" and once dry in the fleece ordinary rains will not wash it out.

COOPER'S Non-Poisonous **FLUID DIPS**

are first in their class for dipping off the shears and dipping lambs especially before putting them on the rape.

THOMAS'

Carbolized Paste Dip

Why you should use Thomas'

IT is easily mixed in cold water.
 IT is death on vermin.
 IT is more lasting than other Dips in its effect.
 IT contains an oily secret that *does* improve the Wool.
 IT leaves no sediment in the bath.

1 case containing 1-80 lb. drum or
 1 case containing 4-20 lb. tins ... £2 15/-
 1 case containing 8-8 lb. tins ... £2 10/-
 Separate tins each 20 lbs. ... 14/6 each.

About a farthing is the cost per sheep.

1 drum equals 80 lbs. paste with 1000 gals. water for 2000 longwools or with 1250 gals. for 2500 merinos.
 1 tin equals 20 lbs. paste with 350 gals. water for 500 longwools or with 312 gals for 625 merinos.
 1 tin equals 8 lbs. paste with 100 gals. water for 200 longwools, price per tin 6/-

These figures are estimated for dipping sheep ten weeks off shears, but if the sheep are dipped off shears a very much larger number can be treated with no more expense. It is, however, desirable to delay the Dipping, so that each sheep can carry away its proper proportion of deterrent poison in its fleece.
