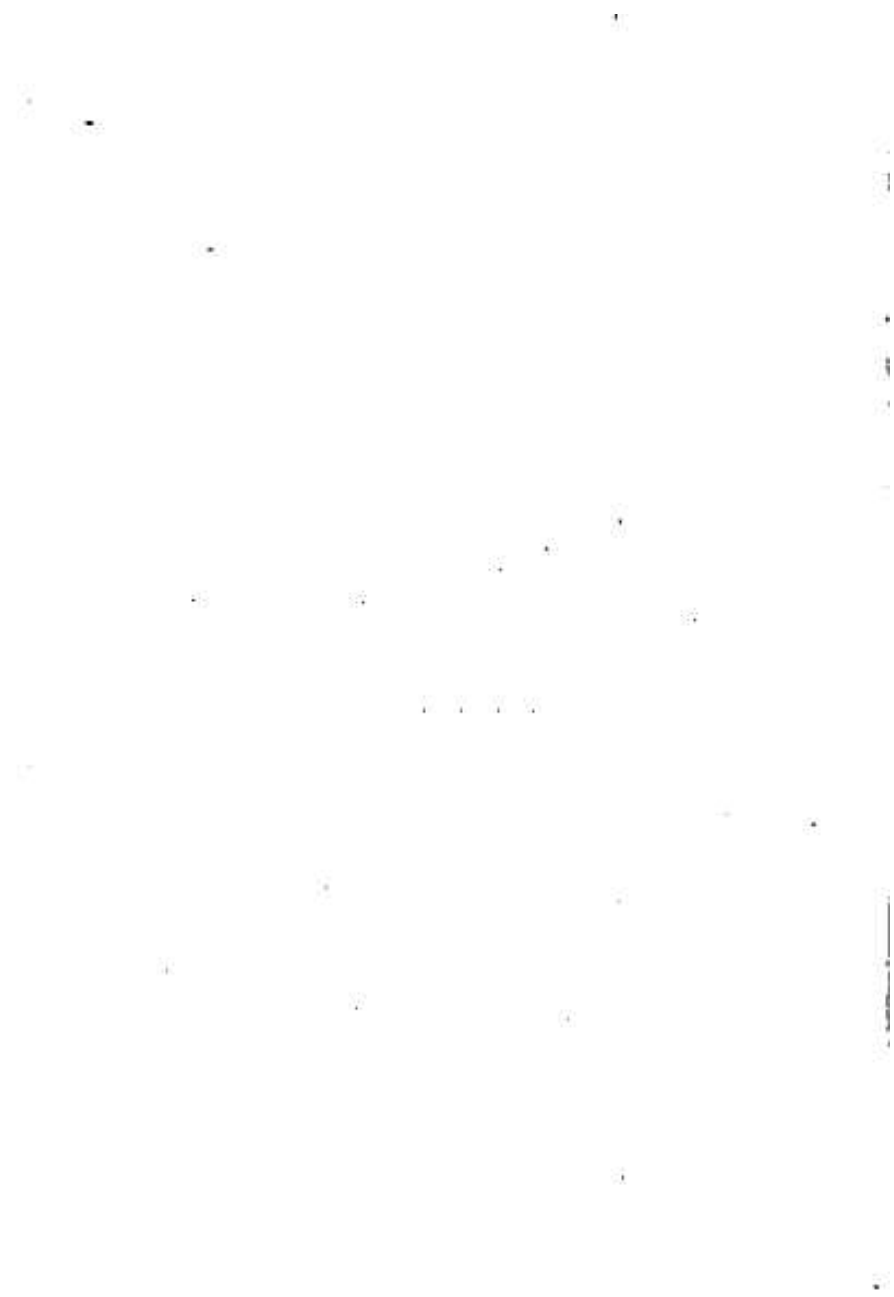

Figure 1: A scatter plot showing the relationship between the number of children and the number of visits. The x-axis represents the number of children (0 to 10), and the y-axis represents the number of visits (0 to 10). A solid diagonal line represents the identity function  $y=x$ . A dashed diagonal line is drawn below the solid line, starting at (0,0) and ending at (10,9). The area between the solid and dashed lines is shaded gray.
