## PREFACE.

---

Having received, through the partial kindness of Mr. A. ZUNDEL, his authorization to prepare a translation, from his valuable edition of the Dictionary of Hertzels d'Arboval, of the highly interesting and instructive series of articles on THE HORSE'S FOOT, which appear in that work, it affords us great pleasure to be enabled to place the results of our labors before our friends and colleagues in the interests of veterinary science in America. Those who have failed to enjoy their perusal and study in the columns of the AMERICAN VETERINARY REVIEW, where they have appeared in consecutive portions, will now have the opportunity of profiting by their instructions in the more compact and convenient form of the present volume.

It is hoped that this work, which treats of a department of professional knowledge which has been comparatively neglected in the works of English veterinary writers, will be accepted and appreciated by our friends, in a manner fully commensurate with the importance of the subject and the ability with which it has been treated.

THE TRANSLATOR.
