CONTENTS

	PAGE
I. CONTINUITY AND IRRATIONAL NUMBERS.	
Preface	1
I. Properties of Rational Numbers	3
II. Comparison of the Rational Numbers with the Points of a Straight Line	6
III. Continuity of the Straight Line	8
IV. Creation of Irrational Numbers	12
V. Continuity of the Domain of Real Numbers	19
VI. Operations with Real Numbers	21
VII. Infinitesimal Analysis	24
II. THE NATURE AND MEANING OF NUMBERS.	
Prefaces	31
I. Systems of Elements	44
II. Transformation of a System	50
III. Similarity of a Transformation. Similar Systems	53
IV. Transformation of a System in Itself	56
V. The Finite and Infinite	63
VI. Simply Infinite Systems. Series of Natural Numbers	67
VII. Greater and Less Numbers	70
VIII. Finite and Infinite Parts of the Number-Series	81
IX. Definition of a Transformation of the Number-Series by Induction	83
X. The Class of Simply Infinite Systems	92
XI. Addition of Numbers	96
XII. Multiplication of Numbers	101
XIII. Involution of Numbers	104
XIV. Number of the Elements of a Finite System	105

CONTINUITY AND IRRATIONAL,
NUMBERS

CONTINUITY AND IRRATIONAL NUMBERS.

MY attention was first directed toward the considerations which form the subject of this pamphlet in the autumn of 1858. As professor in the Polytechnic School in Zürich I found myself for the first time obliged to lecture upon the elements of the differential calculus and felt more keenly than ever before the lack of a really scientific foundation for arithmetic. In discussing the notion of the approach of a variable magnitude to a fixed limiting value, and especially in proving the theorem that every magnitude which grows continually, but not beyond all limits, must certainly approach a limiting value, I had recourse to geometric evidences. Even now such resort to geometric intuition in a first presentation of the differential calculus, I regard as exceedingly useful, from the didactic standpoint, and indeed indispensable, if one does not wish to lose too much time. But that this form of introduction into the differential calculus can make no claim to being scientific, no one will deny. For myself this feeling of dissatisfaction was so overpowering that I made the fixed resolve to keep meditating on the question till I should find a
