THE known talents of Professor JACOBS as a scholar, and the high rank he holds as a critic, will not only be a sufficient apology for the appearance of the following work in this country, but also its best recommendation.

It is neither our wish nor intention to draw any invidious comparison between the book with which we now present the British public, and any other book of a similar kind, which may, at this time, be in general or partial use: on the contrary, we are desirous that every production, deserving of estimation, should have due consideration and encouragement. We, therefore, add the LATIN READER to our list of school books, chiefly in the hope of affording more ample scope for choice, to gentlemen engaged in educating the young, and of conferring a very acceptable service on the young themselves, by furnishing them with a much admired compilation of classical beauties, selected with great learning and taste, fraught with most useful instruction, engagingly

and agreeably conveyed, peculiarly adapted to the capacity of youth; and perfectly free from every thing contaminating to the morals.
