PREFACE

THE following pages have been written as an introduction to the study of the Properties of Matter. The book does not pretend to be in any way a complete treatise. It aims at making clear to one who wishes to understand something of Physics the meaning of the terms applied to matter, and the principal properties it possesses. The subject cannot be fully treated without mathematical reasoning, though in the book itself only a little elementary algebra is used occasionally. I hope that most of the contents may be intelligible and interesting even to those who do not follow the mathematical reasoning when it occurs. In conclusion, my thanks are due to Mr. L. R. WILBERFORCE, for his kindness and assistance in reading the proofs.

R. T. GLAZEBROOK.

CONTENTS

CHAPTER I

INTRODUCTORY—UNITS OF MEASUREMENT

	PAGE
Measurement of Space	1
" " Mass	2
" " Time	3
" " Position	4
" " Velocity	5
" " Acceleration	5

CHAPTER II

MOTION—KINETICS—THE RELATION BETWEEN FORCE AND MOTION—LAWS OF MOTION

Relation between Force and Motion	7
Laws of Motion, Law I.	9
" " II.	12
" " III.	13
Gravitation	15
The Pendulum	16
Weight and Mass	18
Atwood's Machine	20

CHAPTER III

WORK AND ENERGY

	PAGE
Definition and Measurement of Work	24
Units of Work and Power	26
Energy—Potential and Kinetic	30
Conservation of Energy	34
Transformation of Energy	38
Mechanical Equivalent of Heat	40

CHAPTER IV

FORMS OF ENERGY

Energy of Chemical Combination	48
Sound	53
Magnetic Energy	53
Electrical Energy	54

CHAPTER V

FORMS OF MATTER

Solids and their Properties	57
Homogeneous Bodies	59
Isotropic Bodies	60
Anisotropic Bodies	61
Fluids	62
Fundamental Property of a Fluid	62
Liquids	63
Gases	64
Viscosity	65
Plasticity	67
Tenacity	67
Vapours	71

CONTENTS

ix

CHAPTER VI

PROPERTIES OF SOLIDS

	PAGE
Definition and Measurement of Rigidity	72
Shearing Strain and Stress	74
Energy of a Shear	77
Resistance to Compression	79
Energy of a Strained Solid	81
Young's Modulus	82
Poisson's Ratio	83
Bending of a Beam	85
Experimental Methods of Finding Elastic Constants	89
Table of Elastic Constants	93

CHAPTER VII

PROPERTIES OF FLUIDS

Fluid Pressure	98
Density and Specific Gravity	103
Methods of Finding Specific Gravity	105
Manometers	107
The Barometer	108
Pressure of the Air	109

CHAPTER VIII

PROPERTIES OF FLUIDS (*continued*)

Viscosity	113
Cohesion, Sphere of Molecular Action	119
Superficial Energy and Surface Tension	120
Capillarity	121
Compressibility	133
