P R E F A C E .

MARKED changes in the breath have heretofore received little consideration from the profession. Our medical text-books contain scarcely an allusion to their existence. I have endeavored, in the following pages, to give a succinct account of the diseased conditions in which a fetid breath is the most important feature. The principal facts detailed concerning the production of the offensive odors are the results obtained from personal investigations, conducted both in private practice and in our city hospitals.

CONTENTS.

CHAPTER I.

PHYSIOLOGY OF REPAIR, DECAY, AND RESPIRATION.

General Considerations.—Sympathetic Connections.—Changes in the Food during the Process of Digestion.—Destruction and Repair of Tissue.—Compounds resulting from Physiological Decay and Putrefaction.—Composition of Air inhaled and exhaled.—Effects of Medicinal Substances on the Breath.—Causes of Fetid Breath PAGE 7

CHAPTER II.

FETID ODOES FROM EMOTION, ETC.

General Effects of Excessive Emotion.—Cases in which it destroyed Life, and produced Serious Disorders.—Emotion as a Cause of Bad Breath.—Class of Persons most subject to its Influence.—Prevention.—Constipation, its Effects on the Respired Air and Secretions.—Special Deodorizers 21

CHAPTER III.

FETID ODORS FROM DYSPEPSIA.

Causes of Indigestion.—Symptoms.—How Indigestion affects the Air passing from the Lungs.—Relation to Constipation.—Examples.—Various Methods of Treatment.—Bad Breath from Congenital Deficiency of the Eliminating Apparatus of the Intestines 38

CHAPTER IV.

FETID ODORS FROM BAD TEETH AND ULCERS OF THE MOUTH.

Decayed Teeth as a Cause of Bad Breath.—Effects of Decomposing Food in the Cavities of the Teeth.—Causes of Decay.—Development of a Vegetable Parasite in the Mouth from Uncleanliness.—Accumulation of Tartar and its Chemical Composition.—Bad Breath from Inflammations and Ulcerations of the Mouth PAGE 50

CHAPTER V.

FETID ODORS FROM CATARRHAL DISORDERS.

Clergyman's Sore-Throat (Follicular Pharyngitis).—Peculiarities of the Inflammation.—Effects of Decomposing Mucus on the Breath.—Complications.—Treatment.—Cancerous Diseases of the Tongue and Pharynx.—Fetid Odors following Diphtheritic Diseases of the Throat, etc. 67

CHAPTER VI.

CATARRHAL ODORS (CONTINUED).

Ozema depending upon Syphilis, Scrofula, Necrosis, and Caries of the Nasal Bones, and Herpes.—Character of Fetid Odors.—Bad Breath from Ulceration of the Larynx and Trachea.—Putrid Bronchitis.—Bronchiectasis, etc.—Treatment 78

CHAPTER VII.

FETID ODORS FROM MINERAL POISONS.

Use and Abuse of Mercury.—Organs which eliminate the Drug.—Effects on the Salivary Glands.—Quantity of Drug necessary to produce Salivation.—Mercurial Fotor.—Remedies.—Bad Breath from Arsenic, Lead, Antimony, Phosphorus, etc.—Treatment 98

THE BREATH.

CHAPTER I.

REPAIR AND DECAY—RESPIRATION.

General Considerations.—Sympathetic Connections.—Changes in the Food during the Process of Digestion.—Destruction and Repair of Tissue.—Compounds resulting from Physiological Decay and Putrefaction.—Composition of Air inhaled and exhaled.—Effects of Medicinal Substances on the Breath.—Causes of Fetid Breath.

AN offensive breath is a functional disorder liable to occur at all periods of life. Men are more subject to it than women. It is a prominent symptom of many morbid conditions. The affection derives its importance from the fact that it is a constant source of misery to all who, by force of circumstances, are compelled to associate with the unfortunate patient. In its worst forms it effectually destroys the communion of friends, and
