## CLASSIFICATION OF BOOKS.

NOTE.—This classification of *books*, practically applied to a University collection of 60,000 volumes, in its collocation of subjects is believed to more nearly conform to courses of instruction at present pursued in the University than do other schemes now in print. Whenever required by large increase of the Library, a more minute differentiation of topics may be effected by adding lower case letters of the alphabet to class marks here given. The arrangement of Mathematics is that of Professor Irving Stringham, slightly modified.

J. C. R.

A	<b>Bibliography in General. Anonyms, Pseudonyms.</b> <i>Bibliographies of special subjects are arranged under such subjects, adding lower case a to class mark.</i>	[Bibliomania 900
