THERE is nothing that helps a man in his conduct through life more than a knowledge of his own weaknesses (which, guarded against, become his strength), as there is nothing that tends more to the success of a man's talents than his knowing the limits of his faculties, which are thus concentrated on some practicable object.

WILLIAM HAZLITT (*Table-Talk*).

PREFACE

SINCE the publication of my larger book—*Guide to Hand-reading*—a few months ago I have felt induced to bring out a book on this subject at a price within the reach of all.

Something of this description which shall be condensed and yet sufficiently comprehensive has for some time been needed; this work, containing the essentials of my other one in such a manner as to be of help to the student as well as to the beginner, will I hope help to supply this need.

PHANOS.
