## FOREWORD.

This Index has been compiled for the purpose of making the *Studies from The Rockefeller Institute for Medical Research* more readily available for reading and reference. As the pages of the volumes from I to XVI are not numbered consecutively, it was first necessary to do this, in order to give a proper page reference to each item in the Index. We would suggest, therefore, to those possessing the *Studies* that they page Volumes I to XVI inclusive in accordance with the numbers employed in the Index. To do this will not be a laborious task, as possibly it will not be necessary to page the volumes throughout, in detail. It will suffice, we believe, to page the table of contents, and then to designate in each volume the proper page number for the first page of an article, which can be done with the assistance of the author's section of the Index.

For those who desire to page the volumes completely, it may be added that in the consecutive numbering, all pages—those blank, as well as title pages of articles—have been included; but the inserts and plates have not been included in the numbering. We have also not included the tables of contents, as it is the custom to page these in another series of numerals. The paging for each volume has been begun with the first page of the first article in that volume.

## INDEX TO AUTHORS.

### A

- Abbott, A. C.,** and **Gildersleeve, N.** The etiological significance of the acid-resisting group of bacteria, and the evidence in favor of their botanical relation to *B. tuberculosis*, (*Univ. Penn. Med. Bull.*, 1902-03, xv, 106),  
i, 55
- Abderhalden, Emil,** and **Van Slyke, Donald D.** Die Bestimmung des Aminostickstoffs in einigen Polypeptiden nach der Methode von Van Slyke, (*Ztschr. f. physiol. Chem.*, 1911, lxxiv, 505),  
xiv, 693
- , and **Podor, Andor.** Chemische, physikalische, und biologische Studien über die aus den drei Monoaminomonocarbonsäuren: Glykokoll, *d*-Alanin und *l*-Leucin darstellbaren strukturisomeren Tripeptide, (*Ztschr. f. physiol. Chem.*, 1912, lxxxii, 1),  
xvi, 565
- Allen, C. H.** See **LEVENE, WEST, ALLEN,** and **VAN DER SCHEER,**
