*A MIDSUMMER HOLIDAY*

TO THEODORE WATTS

B

1. The first of these is the fact that the University of Chicago has a long and distinguished history of research in the field of the history of science. This is reflected in the work of such prominent scholars as Thomas Kuhn, Imre Lakatos, and Paul Feyerabend, who have all made significant contributions to our understanding of the history of science.

2. The second of these is the fact that the University of Chicago has a strong tradition of interdisciplinary research. This is reflected in the work of such prominent scholars as Robert Oppenheimer, who was a pioneer in the field of nuclear physics, and who also made significant contributions to the history of science.

3. The third of these is the fact that the University of Chicago has a strong tradition of research in the field of the history of philosophy. This is reflected in the work of such prominent scholars as Willard Van Orman Quine, who was a pioneer in the field of philosophy of language, and who also made significant contributions to the history of philosophy.

4. The fourth of these is the fact that the University of Chicago has a strong tradition of research in the field of the history of mathematics. This is reflected in the work of such prominent scholars as Paul Erdős, who was a pioneer in the field of number theory, and who also made significant contributions to the history of mathematics.

5. The fifth of these is the fact that the University of Chicago has a strong tradition of research in the field of the history of biology. This is reflected in the work of such prominent scholars as Theodosius Dobzhansky, who was a pioneer in the field of evolutionary biology, and who also made significant contributions to the history of biology.

6. The sixth of these is the fact that the University of Chicago has a strong tradition of research in the field of the history of chemistry. This is reflected in the work of such prominent scholars as Linus Pauling, who was a pioneer in the field of chemical physics, and who also made significant contributions to the history of chemistry.

7. The seventh of these is the fact that the University of Chicago has a strong tradition of research in the field of the history of physics. This is reflected in the work of such prominent scholars as Albert Einstein, who was a pioneer in the field of relativity, and who also made significant contributions to the history of physics.

8. The eighth of these is the fact that the University of Chicago has a strong tradition of research in the field of the history of astronomy. This is reflected in the work of such prominent scholars as Edwin Hubble, who was a pioneer in the field of cosmology, and who also made significant contributions to the history of astronomy.

9. The ninth of these is the fact that the University of Chicago has a strong tradition of research in the field of the history of earth and planetary sciences. This is reflected in the work of such prominent scholars as Carl Sagan, who was a pioneer in the field of planetary science, and who also made significant contributions to the history of earth and planetary sciences.
