PREFACE.

The material for the subject-matter of this book is based on ten years' dispensary practice in the very large joint disease and fracture service (5,000 cases) of the Good Samaritan Dispensary.

The embodiment in book form of this experience and of what has heretofore been but a fragmentary consideration of the subject is due to the suggestion of Dr. Walter M. Brickner, Chief of the Surgical Out-patient Department, Mt. Sinai Hospital, whose valuable assistance in editing these pages is hereby thankfully acknowledged. Thanks are due to Dr. Maurice Green for his aid in the preparation of the chapter on Plaster of Paris in Dental Surgery. The illustrations are for the most part reproduced by Dr. Erwin Reissman from original photographs and sketches; others from standard text-books of surgery.
