PREFACE AND DEDICATION.

MUCH that I have written is necessarily a repetition of what has been said before, but to make the subject complete I was compelled to combine the old maxims with the new ideas. A portion of the contents has previously appeared in Vols. V. and VII. of the *St. Thomas's Hospital Reports*, and the favourable mention which they received at the time suggested to me the idea of putting them together in one volume.

The drawings which illustrate these pages have been taken principally from the museum of St. Thomas's Hospital, not only because it is very rich in specimens illustrative of this subject, but also that reference may be made with greater ease.

In committing this work to the press I cannot do less than dedicate my labours to those to whom I owe all my medical knowledge—viz.,

vi PREFACE AND DEDICATION.

the staff of St. Thomas's Hospital; but to one especially must I offer my most sincere thanks, for to Mr. Wagstaffe do I owe the great assistance which this work has received during its progress from his friendly criticism.
