## AUTHOR'S PREFACE.

THE superiority of the homœopathic system, in comparison with other modes of treating diseases, is becoming more generally recognised every day; and many of those who have experienced its beneficial effects upon their own persons, are naturally desirous that it should be employed in those affections to which the most useful of their domestic animals are only too often obnoxious. In consequence, however, of few veterinary surgeons having, as yet, embraced and adopted the new mode of treatment, a want is felt for some work that will enable the owner to discover the ailments of his animal, and the most successful means of restoring it to health. This work then, is designed not to supersede the services of the homœopathic veterinary surgeon, when they can be procured, but to supply the deficiency adverted to. It purports to be an easily-understood exposition of the causes which produce, and the symptoms which characterize, the most frequent diseases incidental to the horse, cow, dog, pig and sheep; together with concise directions for the selection, use, and administration of the most efficient homœopathic medi-

cines. In order to render the work extensively useful, the author has carefully avoided, as far as possible, the use of all technical terms, and has confined himself to language which every person can readily understand. A glossary is appended, explaining the signification of certain scientific words which are unavoidably used.

With a view to render the work as complete as its scope and limits admit, the author has availed himself of the researches of others, and has consulted the best works upon the diseases of the lower animals; his aim being to bring within the comprehension of every person, a method of treating the diseases of the horse, cow, dog, pig, and sheep, which many years experience has sanctioned as the best that can be pursued.

87, CROSS STREET, MANCHESTER,  
*August, 1857.*

## CONTENTS.

	PAGE
PREFACE . . . . .	iii
Medicines used, and their strength . . . . .	xi

### DISEASES OF THE HORSE.

#### I—DISEASES OF THE LUNGS, AND OF THE OTHER PARTS CONNECTED WITH THE BREATHING.

Broken Wind . . . . .	10
