1882.

#### PREFACE.

For the following pages I am alone responsible. They contain an attempt to illustrate established truths, and to expose exploded though not obsolete fallacies; but they trench so closely on the politics of the day that I should have scarcely felt justified in writing them for publication without the encouragement of the President of the Board of Trade.

For the Tables appended I am indebted to Mr. E. J. Pearson and Mr. G. H. Simmonds, of the Statistical Department of the Board of Trade. They will be found to contain useful and interesting information, whatever may be thought of the inferences I have drawn from them. Those who have had much to do with statistics will know how difficult it is to use them properly, and how easy and how mischievous it is to use them carelessly and improperly.

T. H. FARRER.

Board of Trade, December, 1881.
