Sheep	193	Winter	61

PREFACE

This volume is published with the hope of enlightening sportsmen upon the perplexing question, Where to hunt American game. That such information is sought we have ample proof.

A few years ago the United States Cartridge Company published and distributed gratuitously a large edition of a work describing the game of several states, with sketches of prominent guides in those states. In less than a week the edition was exhausted, and subsequent editions were quickly distributed. The calls for copies of this work continued, but rather than publish more editions it was thought best to prepare a new work wider in its scope; in fact, embracing the whole United States. For about two years data were collected for this work. After collecting all available material, each state was fully described, and the sketches were forwarded to the governors of the respective states, accompanied by letters asking each governor to read carefully, or hand the matter to the person regarded as the best authority on the subject, to peruse and criticise. It was requested if the matter was incorrect, to point out the error, and if correct, to so state. Most of the states responded promptly. Chapters that were approved as correct were filed ready for press; those that were incorrect were rewritten and again sent out for approval. Most of the governors referred the matter to the game commissioners, and it has their approval.
