**TABLE OF CONTENTS**

Introduction ..... 1

**ARTICLE I. GENERAL PROPERTIES OF MATTER..... 3**

1. Extension ..... 3

2. Impenetrability ..... 3

3. Divisibility ..... 3

4. Porosity ..... 4

5. Expansibility and Contraction..... 5

6. Destructibility ..... 5

7. Inertia ..... 6

**ARTICLE II. ALGEBRAIC PRINCIPLES..... 7**

1. Addition ..... 7

2. Subtraction ..... 8

3. Equation Numbers ..... 9

4. Multiplication ..... 9

5. Division ..... 12

6. Involution ..... 12

7. Evolution ..... 14

8. Logarithms ..... 14

9. Formulas ..... 16

10. Applied Problems ..... 17

**ARTICLE III. GEOMETRICAL PRINCIPLES..... 18**

1. Introductory ..... 18

2. Angles and Triangles..... 18

3. Parallels and Quadrilaterals..... 20

4. Mensuration of Polygons..... 24

5. Proportionality ..... 24

6. Similarity ..... 24

7. Mean Proportionality ..... 25

8. The Circle and its Properties..... 26

9. Applied Problems ..... 28

**ARTICLE IV. TRIGONOMETRY..... 29**

1. Principles and Definitions..... 29

2. The Functions ..... 29

3. Transmutation of Functions..... 30

4. The Signs of Functions..... 30

5. Numerical Limits of Functions..... 31

6. Application to Practical Problems..... 31

7. Solution of Triangles..... 32

8. Problems ..... 33

**ARTICLE V. MENSURATION OF PLANE FIGURES..... 35**

1. Triangles ..... 35

2. Quadrilaterals ..... 35

3. Polygons ..... 36

4. Regular Polygons ..... 36

5. The Circle ..... 37

6. Elements of Sectors and Segments..... 37

7. Applied Problems ..... 38

**ARTICLE VII. MENSURATION OF SOLIDS..... 40**

1. Prisms ..... 40

2. Pyramids ..... 41

3. Prismoids ..... 41

4. Cylinders ..... 42

5. Cones ..... 42

6. Spheres ..... 44

<b>ARTICLE VII. THE PRINCIPLES OF MECHANICAL FORCES.....</b>	<b>46</b>
1. General Principles .....	46
2. The Parallelogram of Forces.....	46
3. Parallel Forces .....	47
4. Center of Gravity for Various Shapes and Figures.....	48
5. The Laws of Gravity.....	50
6. Applied Problems .....	51
<b>ARTICLE VIII. THE THREE STATES OF MATTER.....</b>	<b>53</b>
1. General Principles .....	53
2. Special Properties of Solids.....	54
a. Hardness .....	54
b. Malleability .....	54
c. Tenacity .....	54
d. Elasticity .....	54
3. Properties of Fluids.....	54
a. The Surface of Fluids at Rest is Horizontal.....	54
b. The Pressure in Fluids is Transmitted Equally in all Directions .....	55
c. The Pressure Depends on Depth and Area of Surface.....	55
d. Capillary Attraction .....	56
e. Capillary Repulsion .....	56
f. Buoyancy .....	57
g. Specific Gravity .....	58
h. Compressibility of Water.....	59
4. Properties of Gases.....	59
a. General Deductions .....	59
b. Density of Gases.....	59
c. The Pressure of the Air on the Surface of the Earth.....	59
d. Compressibility of Gases.....	60
e. Buoyancy .....	61
f. Evaporation in Air.....	61
<b>ARTICLE IX. GENERAL HYDRAULIC PRINCIPLES.....</b>	<b>62</b>
1. The Cause of Flow in Fluids, and Definitions.....	62
2. Other Hydraulic Terms and Definitions.....	62
3. General Principles .....	64
4. Forms of Open Channels.....	65
5. The Circular Form.....	67
6. Summary Comparisons .....	68
7. A New Form of Channel.....	69
<b>ARTICLE X. THE COEFFICIENT OF ROUGHNESS.....</b>	<b>71</b>
<b>ARTICLE XI. HOW TO CALCULATE "n".....</b>	<b>73</b>
<b>ARTICLE XII. EXPLANATION OF THE "C" TABLES.....</b>	<b>75</b>
<b>ARTICLE XIII. PROBLEMS OPEN CHANNELS.....</b>	<b>76</b>
1. Triangular Channels .....	76
2. The Rectangular Channel.....	77
4. Trapezoidal Channel .....	78
5. The Chicago Drainage Canal.....	79
6. Problem, Chicago Drainage Canal.....	80
7. Problem, Find the Slope.....	81
8. Problem, Chicago Drainage Canal.....	82
9. The Chicago River.....	82
<b>ARTICLE XIV. CLOSED CHANNELS.....</b>	<b>85</b>
1. Rectilinear Channels .....	85
2. Cylindrical Channels .....	85

TABLE OF CONTENTS.

iii

3. Applied Problem .....	86
4. Find the Necessary Size.....	87
5. Find the Necessary Slope.....	88
6. The Composite Section.....	89
7. Find Flow Area and Velocity.....	89
8. Comparisons Between Circular and Composite Sections.....	90
<b>ARTICLE XV. PIPES FLOWING FULL UNDER PRESSURE.....</b>	<b>92</b>
1. General Deductions .....	92
2. Find Velocity in Cast Iron Pipe.....	94
3. Find Pressure in Cast Iron Pipe.....	94
4. Find Diameter of Cast Iron Pipe.....	94
5. Find Length of Cast Iron Pipe.....	95
6. Find the Factor "C" for Cast Iron Pipe.....	95
<b>ARTICLE XVI. LOSS OF HEAD BY ENLARGEMENT OF CHANNEL.....</b>	<b>97</b>
1. The Principle Involved.....	97
2. Applied Problem .....	97
<b>ARTICLE XVII. SUBDIVISION OF CHANNELS.....</b>	<b>99</b>
1. The Analysis .....	99
2. Problem .....	100
<b>ARTICLE XVIII. LOSS OF HEAD AT ENTRANCE TO PIPES.....</b>	<b>103</b>
<b>ARTICLE XIX. DITCHES.....</b>	<b>103</b>
1. General Remarks .....	103
2. Triangular Ditches .....	103
3. Rectangular Ditches .....	104
4. Trapezoidal Ditches .....	104
<b>ARTICLE XX. DITCH TABLES AND THEIR APPLICATION.....</b>	<b>106</b>
1. How to Use Them.....	106
2. Table of Capacity of Triangular Ditches.....	106
3. Rectangular Ditch, 2 ft. Base.....	101
4. Rectangular Ditch, 4 ft. Base.....	107
5. Trapezoidal Ditch, 1 ft. Base, Slope $\frac{1}{2}$ to 1.....	108
6. Trapezoidal Ditch, 1 ft. Base, Slope 1 to 1.....	108
7. Trapezoidal Ditch, Base 1 ft., Slope $\frac{1}{2}$ to 1.....	108
8. Trapezoidal Ditch, Base 4 ft., Slope $\frac{1}{2}$ to 1.....	109
9. Trapezoidal Ditch, Base 1 ft., Slope 2 to 1.....	109
10. Trapezoidal Ditch, 2 ft. Base, Slope 2 to 1.....	109
11. Trapezoidal Ditch, 3 ft. Base, Slope 1 to 1.....	109
12. Trapezoidal Ditch, 10 ft. Base, Slope 1 to 1.....	110
13. Lined Ditches, Advantage of.....	110
14. Flumes .....	111
<b>ARTICLE XXI. FLOW MEASUREMENTS.....</b>	<b>114</b>
1. How to Determine Flow Area.....	114
2. How to Find Mean Velocity of Flow.....	115
3. How to Find the Sine of Slope.....	115
4. Weirs and Weir Measurements.....	118
5. Measuring Boxes .....	118
6. The Miner's Inch.....	119
<b>ARTICLE XXII. THE USE OF LOGARITHMS.....</b>	<b>121</b>
1. Multiplication by Logarithms.....	121
2. Division by Logarithms.....	122
3. Involution by Logarithms.....	122
4. Evolution by Logarithms.....	123
"C" Table A, Various Slopes for $n = .008$ .....	124

"C" Table I,	Various Slopes for $n = .009$ .....	125
"C" Table II,	Various Slopes for $n = .010$ .....	126
"C" Table III,	Various Slopes for $n = .011$ .....	127
"C" Table IV,	Various Slopes for $n = .012$ .....	128
"C" Table V,	Various Slopes for $n = .013$ .....	129
"C" Table VI,	Various Slopes for $n = .015$ .....	130
"C" Table VII,	Various Slopes for $n = .017$ .....	131
"C" Table VIII,	Various Slopes for $n = .020$ .....	132
"C" Table IX,	Various Slopes for $n = .025$ .....	133
"C" Table X,	Various Slopes for $n = .030$ .....	134
"C" Table XI,	Various Slopes for $n = .035$ .....	135
"C" Table XII,	Various Slopes for $n = .040$ .....	136
"C" Table XIII,	Various Slopes for $n = .050$ .....	137
Table XIV,	Square Roots of Numbers for $r$ and $s$ .....	138
Table XV,	Hydraulic Elements of the Circle.....	142
Table XVI,	Hydraulic Elements of Composite Section.....	144
Table XVII,	Areas and Circumference of Circles.....	146
Table XVIII,	Table of Hydraulic Equivalents.....	150
Table XIX,	Table of Weights of a Cubic Foot of Various Substances .....	151
Table XX,	Conversion Table of U. S. and Metric Measures and Weights .....	154
Table XXI,	Conversion Table, Millions of Gallons per 24 Hours.....	155
Table XXII,	Sizes of Pipes or Cylindrical Conduits Required for Flow of Given Quantities of Water at Given Velocities .....	157
Table of Squares, Cubes, Square and Cube Roots.....		159
Table of Logarithms.....		164
Table of Natural Sines and Cosines.....		184
Table of Natural Tangents and Cotangents.....		196
