PREFACE.

THE contents of this book originally appeared in the columns of the *Volunteer Service Gazette* as articles on "Snider Target Shooting," and I have been led to publish them in this form by the letters I received during the original periodical appearance of the articles, suggesting that this course should be taken, and in the hope that, being in a more portable form, the information it contains may be of use at the ranges, and serve as a sort of pocket guide.

In doing this I have endeavoured to give increased interest to the work by a careful revision, and, where the original text only applied to the Snider, by adding fresh matter so as to compose a Manual of Target Shooting with all classes of Military Rifles.

THE AUTHOR.
