J. H. TRYBOM.

THE present bibliography is a third edition of that published in 1898 by the American Manual Training Association and extended in 1900 by the Eastern Manual Training Association.

The present issue, while arranged upon the same general lines as the previous editions, includes two new divisions: Design and Applied Art, and Technology and Industrial Evolution. The inclusion of lists of suggestive material in these fields has been deemed essential to meet the present needs of manual training workers. On the other hand, the great mass of technical and art literature has allowed mention only of a very few works in each division. These have been selected with a view to their direct value to those engaged in manual training teaching.

In order to render this bibliography as helpful and comprehensive as possible, it is earnestly requested that members of the Association will send to the Secretary the names of such books and articles not contained in these lists as they consider of value.

C. R. RICHARDS.
GUSTAF LARSSON.
IDA HOOD CLARK.
