## PREFACE

**I**N presenting these conclusions of Experimental Psychology which cover years of time and thousands of practical experiments, we will not attempt to prove many of our claims, such for instance as *Duality of Mind*. Much has been written in opposition, but not one fact has been advanced in support of the opposition. We will, therefore, proceed upon the truth of the hypothesis, that is that man has a duality of mind. If our readers desire a full explanation, reason advanced by induction, deduction and synthetic analysis, we refer them to Hudson's "Law of Psychic Phenomena," and others, for duality of mind, and to Gray's "Anatomy" for corporal duality.

The old psychology is passing away and the new experimental is becoming standard, and as man becomes able to understand and know the Law, he will be enabled to say with Kingsley,—

"So fleet the works of man, back to earth again,  
Ancient and holy things fade like a dream."
