DEDICATION.

This book is dedicated to prospective mothers, who, by the study of it, and by adopting the suggestions that will be found in its pages, may be relieved from many a heartache, and thus not only benefit themselves, but the unborn millions who will be saved from what in many cases is worse than death—i. e., deformed brains and bodies.

INVESTIGATIONS RESPECTING CONGENITAL DEFORMITIES, AS RECOMMENDED
BY MR. C. J. BAYER, OF GRINNELL.

The study of physical and mental deformities is a far-reaching, interesting, and important one. The suggestions of Mr. Bayer commend themselves to all students of heredity, and this Board would be glad to aid in any manner, consistent with its general duties, in the prosecution of that study.

DR. J. F. KENNEDY, Secretary.

"A great new world looms into sight, like some splendid ship, long waited for: The world of heredity, of pre-natal influence, the greatest right of which we can conceive—the right of a child to be well born—is being slowly, surely recognized." FRANCIS E. WILLARD.
