#### PREFATORY NOTE.

The following tables have been prepared particularly for use in finding the investment values of the outstanding government securities, corresponding to prices as quoted in the New York market.

The amounts shown in the tables are the net prices or values to the nearest mill of a \$100 bond, with the indicated time to run to maturity, corresponding to the indicated rates of interest per annum; interest payable and reinvested quarterly.

This net price is the flat price as quoted on the Stock Exchange, less the interest accrued and unpaid on the bond. The accrued interest can be obtained directly from the accompanying simple interest table.
