BAILEY WILLIS

**THE MECHANICS OF
APPALACHIAN
STRUCTURE**

DEPARTMENT OF THE INTERIOR—U. S. GEOLOGICAL SURVEY.

THE MECHANICS OF APPALACHIAN STRUCTURE.

BY

BAILEY WILLIS.

CONTENTS.

	Page.
Introduction.....	217
Types of structure.....	219
Folds.....	219
Parts of folds.....	219
Combinations of folds.....	220
Varieties of folds.....	220
Faults.....	222
Classification of faults.....	222
Parts of faults.....	223
Structural districts of the Appalachian province.....	224
District of open folding—Pennsylvania—West Virginia.....	224
District of close folding—Appalachian valley.....	225
District of folding and faulting—Virginia—Tennessee—Georgia.....	226
District of schistosity—Smoky mountains.....	229
The structural problem.....	229
Experimental researches.....	230
Sir James Hall, 1812.....	231
Alphonse Favre, 1878.....	232
Hans Schardt, 1884.....	232
H. M. Cadell, 1888.....	234
Problem of structural experiments.....	235
Analysis.....	236
Synthesis.....	241
Theory of strains under experimental conditions.....	244
Behavior of very soft beds.....	245
Behavior of very hard beds.....	245
Development of folds and law of competent structure.....	247
Consequences of law of competent structure.....	250
Field observations bearing on competent structure.....	253
Initial dips of deposition and their relation to folds.....	253
Massanutten mountain.....	254
Bays mountain.....	255
Anthracite basins of Pennsylvania.....	256
Competent anticlines in nature.....	263
Appalachian thrusts.....	268
Theoretical suggestions.....	274

ILLUSTRATIONS.

	Page
PLATE XLVI. Devil's Promenade, Indian Territory.....	212
XLVII. Ideal statement of the structural problem.....	216
XLVIII. Syncline and anticline.....	218
XLIX. Anticline on the Potomac river.....	220
L. Types of folds.....	222
LI. Types of folds.....	224
LII. A thrust and parts of a thrust.....	228
LIII. Types of thrusts.....	228
LIV. Types of thrusts.....	230
LV. Structural districts of the Appalachian province.....	232
LVI. Map of district of open folding.....	234
LVII. Map of district of close folding.....	238
LVIII. General map of faulted district.....	240
LIX. Special map of faulted district.....	242
LX. Columnar sections of district of open folding.....	244
LXI. Columnar sections of district of faulting.....	246
LXII. Folded shale.....	250
LXIII. Folded shale.....	252
LXIV. Folded limestone.....	254
LXV. Folded sandstone and shale, overturned.....	256
LXVI. Compression machine for experiments.....	258
LXVII. Squeezed tissue paper.....	260
LXVIII. Initial dips in formation VI on the Susquehanna section, Pa.....	262
LXIX. Thickness of Pottsville conglomerate in Panther creek and Mahanoy basins.....	264
LXX. Carinate fold in limestone.....	266
LXXI. Carinate fold in limestone.....	268
LXXII. Stanton shaft inversion, Wilkes Barre.....	270
LXXIII. Section after Ashburner.....	272
LXXIV. Stepfold in slate.....	274
LXXIV-XCVI. Plates showing results of experimental work, to follow text.....	
FIG. 16. Parts of folds.....	218
17. Transmission of forces.....	248
