PREFACE TO FOURTH EDITION.

---

It is a source of much gratification to the author that the hope expressed in the preface to the third edition has been realized: namely, that this book might become increasingly useful to medical students as well as nurses. The present revision concerns itself largely with those portions of especial interest to medical men.

The book has been very materially enlarged. There will be found a new section entitled "Symbolism in Sanity and in Insanity." Studies have been made of certain paranoid and hysterical states on the basis of Freud's researches and a more detailed description of symptoms and symptom groups incorporated. The section on "Management of Cases of Insanity from the Medical Standpoint" has been amplified and, it is hoped, improved.

The second part, 'The History of the Church in the Modern Age', covers the period from the beginning of the modern era to the present.
