PREFACE.

THIS volume is only intended to embody briefly the main facts known in regard to the diseases treated of.

It is a compilation from various authors, and has been written in the form of question and answer for the convenience of students.

Theories regarding the origin of diseases have been avoided as much as possible, and none but English words have been used where it was possible to avoid the foreign equivalent.

The principal authorities consulted are Fagge, Charcot, Strümpfel, Niemeyer, Bennett, Flint, Delafield, Gowers, and various hospital reports.

E. T. DOUBLEDAY,
J. DARWIN NAGEL.
