INTRODUCTION BY THE EDITOR

The Social Welfare Library is notably enriched by the present volume on Industry and Human Welfare. Its author is a specialist, but he has not written for specialists. He is a journalist, but this is not, strictly speaking, an attempt to "popularize" a technical subject. It is intended for that already large and increasing number of citizens who are concerned that industry shall be productive and not destructive; that it shall promote the general welfare, without injury to workers; that the work of the nation shall be done by the natural and legitimate workers, not by children or invalids, and each part of it by those physically and mentally qualified for it.

This Library is designed for those who are interested in promoting the conditions which favor a happy and useful life for all people. Among the most important conditions are those which affect income. Knowledge of the effect of industry itself on the worker and his family, his wages, his hours of labor, the regularity of employment and the hazards of industry, is therefore fundamental. The public official, the church visitor, the private citizen interested in family welfare or in child welfare, has to understand what has happened as a result of the industrial changes of the past century if he is to get the elementary satisfaction to which he is entitled from his efforts. At the present
