**A PRACTICAL DESCRIPTION
OF EVERY FORM OF
MEDICO-ELECTRIC
APPARATUS IN MODERN USE**

A PRACTICAL DESCRIPTION
OF EVERY FORM OF
MEDICO-ELECTRIC APPARATUS
IN MODERN USE,
WITH PLAIN DIRECTIONS FOR
MOUNTING, CHARGING, AND WORKING.

Illustrated by carefully drawn Engravings,
AND INTENDED TO SERVE AS A GUIDE TO MEDICAL MEN IN THE
SELECTION OF THEIR INSTRUMENTS, AND AS A HANDY
BOOK OF REFERENCE FOR ALL MECHANICAL
DETAILS CONNECTED THEREWITH.

BY
SALT AND SON,
ANATOMICAL MECHANICIANS TO H.R.H. THE PRINCE OF WALES,
IMPORTERS AND MANUFACTURERS OF
MEDICO-ELECTRIC APPARATUS,
21, BULL STREET, BIRMINGHAM.

LONDON:
J. & A. CHURCHILL, NEW BURLINGTON STREET.
1875.

Price Two Shillings and Sixpence.

126. e. 58.

P R E F A C E.

THE rapid strides which have been made during the last few years in the scientific application of Electricity for the relief and cure of diseases, render needless any apology for the publication of this little brochure, whose only claim to the notice of the Profession is that it lays before them in a clear and distinct form, and with the aid of accurate and carefully drawn illustrations, all the most approved of the many forms of apparatus which have been devised by physicians and others for their use.

All obsolete types, and such as lack authoritative professional recommendation, have either been discarded altogether, or passed briefly over, and a careful description of the mode of use is added for each instrument described, so as to enable a medical man to judge which form of apparatus is best suited for his special purpose; the therapeutic mode of applica-

tion must, of course, be decided for each case individually, and lies beyond our province.

The descriptions and drawings are culled from various sources by the light of personal experience, and we may specially mention the excellent works by M. Duchenne, M. A. de la Rive, Dr. Tibbits' Manual on Electricity, and some valuable articles on the subject by Dr. Julius Althaus, which appeared in the "British Medical Journal" in 1873, and were lately reprinted in a separate form. Of course, in a descriptive work, treating of subjects which have been previously discussed, it is impossible to avoid an occasional apparent plagiarism, and we most gratefully acknowledge all assistance derived from other authors.

The prices of the various instruments described will be found in an Appendix; nearly every one is kept constantly in stock, and can be supplied, charged and ready for instant use, at an hour's notice.

21, BULL STREET, BIRMINGHAM,
December, 1874.

TABLE OF CONTENTS.

PART I.

GALVANIC BATTERIES.

Preliminary—Desiderata of a Galvanic Battery—The Becker-Muirhead Battery—Mode of Cleansing—Importance of Cleanliness—Leclanché's Battery improved by Gaiffe—Beetz's Battery—Gaiffe's Chloride of Silver Battery—Stöhrer's Chloride of Silver Battery—Pulvermacher's Flexible Batteries—Stöhrer's Hospital Battery—Description—Stöhrer's Portable Battery—Description—Mode of Mounting—Mode of Charging—Mode of Nursing—Mode of Amalgamating the Zinc Plates—Weiss's Galvanic Battery—Description—Mode of Charging—Mode of Depolarizing—Mode of Cleansing—Mayer and Meltzer's Compound Battery—Description—Mode of Charging—Mode of Working—Mode of Cleansing—Kidder's Battery—Sandy's Battery pp. 1—31

PART II.

ELECTRO-MAGNETIC MACHINES.

Preliminary—Characteristics of an Induction Battery—Stöhrer's Single-cell Induction Battery—The Cell—The Coils—The Interrupter—Mode of Using the Battery—Modifying the Power of the Current—Stöhrer's Double-cell Induction Battery—The

Cells—Mode of Connecting—Mode of Modifying—Improvements in the Interrupter—Weiss's Battery—Description—Mode of Use—Mackenzie's Battery—Mode of Use—Hearder's Battery—Duchenne's Larger Battery—Description—The Cells—The Coil—The Interrupter—Mode of Charging—Duchenne's Portable Battery—Description—Mode of Charging—Gaiffe's Battery—Description—Mode of Use pp. 32—56

PART III.

ACCESSORIES OF THE BATTERY.

The Conductors—The Rheophores—Sponge-holders—Discs—Olivary and Conical Rheophores—Brush Rheophore—Mackenzie's Laryngeal Rheophore pp. 57—60

PART IV.

GALVANO-CAUSTIC APPARATUS.

Middeldorff's Battery—Mayer and Meltzer's Battery—Mayer and Meltzer's Improved Battery—Description and Mode of Use—The Galvanic Ecraseur—Porcelain Cauterics—Platinum Cauterics—Observations on their Use pp. 61—66

APPENDIX.

Prices of the Batteries p. 67
