PREFATORY NOTE.

THE present part of the Catalogue is based, to a large extent, on materials left behind by my late friend and collaborator, Dr. Ernst Haas; and the same will be the case as regards the remaining sections of the work. Since the time when the MSS. here dealt with passed through Dr. Haas's hands—in the case of the majority of them upwards of twenty years ago—so many new MSS. have come to light, and so much has been done in the way of cataloging collections, and editing hitherto unpublished works, that his descriptions could not but be expected to require, not only a very thorough revision, but also very considerable alterations; and accordingly there is scarcely a single MS. among those noticed in the present part which has not been subjected to a renewed examination. In this work of revision Professor Aufrecht's *Catalogus Catalogorum* has been of great use to me; for, besides facilitating the task of cataloging Sanskrit MSS. generally, this work also proves an excellent guide to research by bringing out clearly the points on which additional information is still required regarding particular authors and works.

As in former parts, I have to express my sincere thanks to several scholars for valuable assistance rendered me during the progress of the work,—first and foremost to Professor Aufrecht for having again kindly taken upon himself the trouble of reading the proof-sheets, and for having offered numerous suggestions and corrections. To the late Professor R. von Roth, as well as to Professors Macdonell and Bendall, I am indebted for collations of passages of MSS. and editions within their reach; whilst Professor Kern I have to thank for suggestions regarding the classification of astronomical and astrological works, and Professor Kielborn for the verification of several dates. In my constant dealings with the India Office Library I have met with unvarying courtesy and hearty co-operation on the part of Mr. Tawney and his staff, and have never appealed to them in vain when information was required regarding MSS. and editions in the Library.

J. EGGELING.

Edinburgh, February 1896.

CONTENTS OF PART V.

SANSKRIT LITERATURE :—

A. *Scientific and Technical Literature (continued):—*

IX. Medicine (Āyurveda, Vaidyaśāstra):	PAGE
