PREFACE

THE reasons for writing this book are :

(1) No book of a similar kind has been published.

(2) Many enquiries regarding the history and management of London trees suggest that such a work will be useful ; and

(3) The author's experience of tree life in London, which has extended over a period of twenty-five years, will, it is hoped, be helpful to others who are similarly interested.

This book has no pretensions to contain a complete list of trees growing in London, but rather is a brief account of such kinds as the author has thought worthy of note during the quarter of a century with which he has been connected with some of the Royal parks and gardens of the Metropolis.

To Mr. F. W. Parker, of the Parks Department, London County Council, I am indebted for valuable information and some of the photos.
