ADVERTISEMENT.

THE object of the Author has been to place in the hands of students and practical men—of masters and workmen—architects, builders, and their employers, no less than in those of “ ‘prentices in the craft,” young men learning their profession or calling, an easier method for taking Quantities and Méasurements of different work in the Building Trade, than that usually gleaned from books, and one that has reference to the practice now generally adopted by Surveyors.

July, 1867.
