CONTENTS.

CHAPTER I.

INTRODUCTION	page 1
------------------------	--------

CHAPTER II.

BINOCLULAR VISION.

Binocular vision—Grades of binocular vision—Tests for binocular vision—The normal development of the fusion sense in infancy	page 7
--	--------

CHAPTER III.

CONVERGENT SQUINT.

General description of the anomaly—Clinical varieties—Suppression of the vision of the deviating eye—Diplopia artificially produced—Nature of diplopia—The amblyopia of convergent squint—The power of central fixation in the deviating eye—False fixation—False macula—Monocular diplopia—Apparent vertical deviation—True vertical deviation—Spurious squint of infants—Spontaneous "cure" of squint—Course of an untreated case of squint—Age of onset of squint—Refractive error in convergent squint—Statistical tables—Relative frequency of squint	page 25
--	---------

CHAPTER IV.

THE ETIOLOGY OF CONVERGENT SQUINT.

Muscle theory—Donders' theory—Etiology of convergent squint—Defect of the fusion sense the fundamental cause—Subsidiary causes—Proofs of the Author's contention	page 48
--	---------

CHAPTER V.

AMBLYOPIA, CONGENITAL AND ACQUIRED.

Congenital amblyopia — Acquired amblyopia —
 Illustrative cases—Amblyopia in cases of convergent
 squint—Statistical tables page 63

CHAPTER VI.

THE METHOD OF INVESTIGATING A CASE OF SQUINT.

History—The character of the squint—Cover test—
 Mirror test—Diagnosis between squint and paralysis
 —The power of central fixation—The movements of
 each eye separately—Dynamic convergence—Vision
 testing—Snellen's types—The ivory-ball test—The
 examination of the fusion sense—Measurement of the
 angle of the deviation—The Deviometer—Maddox
 tangent scale—Priestley Smith's tape—The perimeter
 —Estimation of refractive error page 78

CHAPTER VII.

THE TREATMENT OF CONVERGENT SQUINT.

The objects of treatment—The means by which
 these objects may be attained—Optical correction—
 Spectacles for children and for infants—Occlusion of
 the fixing eye—Instillation of atropine into the fixing
 eye *only*—Fusion training—Operation—Indications for,
 and choice of, operation—Alternating squints—Occa-
 sional squints—Vertical deviations page 97

CHAPTER VIII.

THE METHOD OF TRAINING THE FUSION SENSE.

Preliminary remarks—The age at which the fusion
 sense may be educated—The Amblyoscope—Its illu-
 minating apparatus—Three classes of object slides—
 Fusion training—The method of overcoming the "sup-
 pression"—Simultaneous vision—Fusion of images—
 Increasing the amplitude of fusion page 118

CHAPTER IX.

DIVERGENT SQUINT.

Myopic divergent squint—Neuropathic divergent squint—Non-comitant divergent squints other than paralytic—Divergence in extreme myopia—Divergence of blind eyes—Divergence secondary to tenotomy page 133

CHAPTER X.

TREATMENT OF SQUINT.

Illustrative cases page 141

CHAPTER XI.

HETEROPHORIA.

Orthophoria—Heterophoria—Methods of testing the muscular balance of the eyes—Esophoria—Exophoria—Hyperphoria—Cyclophoria—Illustrative cases page 164
 Insufficiency of dynamic convergence page 196

CHAPTER XII.

OPERATIONS ON THE EXTERNAL OCULAR MUSCLES.

Advancement of a rectus muscle—The author's advancement operation—Musculo-capsular advancement—Secondary advancements—Tenotomy—Complete central tenotomy page 201

APPENDIX.

Details of cases of congenital amblyopia—Prisms and decentred lenses—Results of fusion training—Results of advancement operations—Details of construction of the deviometer—Modifications of the amblyoscope—Advancement forceps page 210

INDEX.
