PREFACE.

HIS little work makes no pretension to the formal dignity of a treatise. Its chief aim is to expose certain fallacies which prevail on the subject of child-management and education. I have simply tried to indicate, in suggestive outline, the principles which should guide parents in the care and culture of youth. Whether I have done any service must be left to the judgment of those who adopt the hints thrown out and embody them in practice. The "Jottings on Detail," which I have placed at the end, are gossiping notes, and scarcely skim the subjects of which

they treat; but they may give rise to useful trains of thought in other minds, and with that hope I offer them.
