

**A TREATISE ON THE  
ASSAYING OF  
LEAD, COPPER, SILVER,  
GOLD, AND MERCURY**

Published @ 2017 Trieste Publishing Pty Ltd

ISBN 9780649067374

A Treatise on the Assaying of Lead, Copper, Silver, Gold, and Mercury by Th. Bodemann & Bruno Kerl

**TH. BODEMANN & BRUNO KERL**

**A TREATISE ON THE  
ASSAYING OF  
LEAD, COPPER, SILVER,  
GOLD, AND MERCURY**

Entered, according to Act of Congress, in the year 1865, by  
THE BERZELIUS TRUST ASSOCIATION,  
In the Clerk's Office of the District Court of the United States, for the  
Southern District of New York,

## TABLE OF CONTENTS.

---

	PAGE
Preface, . . . . .	7*
Introduction, . . . . .	11
Assay weights, . . . . .	11
Black, white, and raw flux, . . . . .	13

### LEAD ASSAY.

Defects of the dry lead assay, . . . . .	17
Inaccuracy of the dry lead assay, and its causes, . . . . .	17
Classification of the Lead Assay, . . . . .	19
Sulphurized ores and products, . . . . .	19
Oxydized ores and products, . . . . .	20

### SECTION I.

ASSAYS FOR ORES AND METALLURGICAL PRODUCTS WHICH CONTAIN THE LEAD COMBINED WITH SULPHUR OR SELENIUM, . . . . .	21
A. Ores and metallurgical products with a <i>small</i> amount of foreign sulphids, and a greater or less quantity of earthy in- gredients, . . . . .	21
Fusion with carbonate of potassa, . . . . .	21
Method at the Oberharz Smelting Works, . . . . .	21
Theory, . . . . .	24
Remarks upon this assay, . . . . .	26
Fusion with black flux, . . . . .	29
Theory, . . . . .	29
Method at the Victor Frederick Smelting Works, . . . . .	30
Fusion with metallic iron and carbonate of potassa, carbonate of soda, or black flux, . . . . .	30

	PAGE
Process (in Freiberg), . . . . .	30
Theory, . . . . .	32
Remarks upon this assay, . . . . .	33
Modifications of this assay, . . . . .	34
Fusion with reducing agents and fluxes in wrought iron crucibles, . . . . .	35
B. Ores and metallurgical products containing a <i>considerable</i> quantity of foreign sulphids, or arsenids and antimonids, with a greater or less amount of earths, . . . . .	35
General remarks, . . . . .	35
Roasting and reducing assay, . . . . .	36
Process at the Unterharz, . . . . .	36
Theory, . . . . .	37
Remarks upon this assay, . . . . .	37
Assay with sulphuric acid, . . . . .	38
C. Substances poor in lead, but containing a considerable quantity of earthy matters, . . . . .	39
Smelting with fluxes and a weighed quantity of silver, . . . . .	39
Fusion with solvent agents and iron (Rivot's method), . . . . .	40
Indirect methods (by calculation) . . . . .	40

## SECTION II.

ASSAYS FOR ORES AND METALLURGICAL PRODUCTS WHICH CONTAIN THE LEAD AS OXYD, . . . . .	41
A. The oxyd of lead is combined with fixed mineral acids, . . . . .	41
Fusion with reducing agents, . . . . .	41
Fusion with reducing agents and iron, . . . . .	42
B. The oxyd of lead is free or combined with silicic acid, carbonic acid, or an organic acid, . . . . .	42
Fusion with reducing agents, . . . . .	42
Fusion with reducing and solvent agents, . . . . .	43

## SECTION III.

LEAD ALLOYS, . . . . .	45
Assay with sulphuric acid, . . . . .	45

CONTENTS.

v

	PAGE
Additional remarks upon the lead assay, . . . . .	46
Comparison of the different assays for the doeimastic determination of lead in their application to various products, . . . . .	46
Levol's fusion assay with ferrocyanid and cyanid of potassium,	47
Schemnitz lead assay, . . . . .	48

COPPER ASSAY.

Classification of the copper assay, . . . . .	49
General remarks, . . . . .	49
Classification, . . . . .	50

SECTION I.

COPPER ASSAYS IN THE DRY WAY, . . . . .	52
I. Sulphuretted ores and products with or without accompa- nying selenium, arsenic, or antimony, . . . . .	52
A. Assays for rich ores and products, . . . . .	52
German copper assay, . . . . .	52
Roasting, . . . . .	52
Fusion to black copper, . . . . .	55
Refining of the black copper, . . . . .	60
Refining on the refining dish, . . . . .	61
Refining on the cupel, . . . . .	64
English copper assay, . . . . .	66
Plattner's copper assay, . . . . .	68
B. Assays for poor ores and products, . . . . .	69
Concentration fusion, . . . . .	69
Fusing with collecting agents, . . . . .	69
II. Oxydized ores and products, . . . . .	70
Fusion to black copper, . . . . .	70
Roasting and smelting to black copper, . . . . .	71

	PAGE
Fusing with reducing and collecting agents, . . . . .	71
Concentration smelting, . . . . .	71
III. Copper alloys, . . . . .	72
Different methods, . . . . .	72
Remarks on the dry copper assay, . . . . .	73

## SECTION II.

COPPER ASSAYS IN THE WET WAY, . . . . .	74
I. Assays for substances rich in copper, . . . . .	74
Modified Swedish assay in use at the Oberharz Smelting Works, . . . . .	74
Old method, . . . . .	74
New method, . . . . .	75
Mohr's modification, . . . . .	78
Extension of the Oberharz method, . . . . .	78
Colorimetric copper assays, . . . . .	81
1. Heine's method, . . . . .	81
Standard fluids, . . . . .	82
Production of the assay fluid, . . . . .	84
Comparison of the assay and normal fluids, . . . . .	86
Limits of application of this assay, . . . . .	87
Substances which interfere with the assay, . . . . .	87
Changeableness of the standard fluids, . . . . .	89
2. Jacquelin's and von Hubert's method, . . . . .	90
Process, . . . . .	90
Normal solution, . . . . .	90
Assay fluid, . . . . .	90
Comparison of the normal solution with the assay fluid, . . . . .	91
Remarks upon this assay, . . . . .	93
Comparison of this assay with Heine's method, and the Oberharz process, . . . . .	93
3. Müller's assay with the complementary colorimeter, . . . . .	94
Nature of this assay, . . . . .	94
Volumetric copper assays, . . . . .	95
Different methods, . . . . .	95
1. Pelouze's method by precipitation with sulphid of sodium, . . . . .	95
Nature of this assay, . . . . .	95
Process, . . . . .	96

CONTENTS.

vii

	PAGE
Production of the sulphid of sodium solution, . . . . .	96
Remarks upon this assay, . . . . .	97
2. Schwartz's method with the modification of F. Mohr, . . . . .	98
Process, . . . . .	98
Other copper assays, . . . . .	99
Methods of Levol, Robert and Byer, and Rivot, . . . . .	99
II. Assays for substances poor in copper, . . . . .	100
Colorimetric copper assay, . . . . .	100
Additional remarks upon the copper assay, . . . . .	100
Charging of the copper assay at Schemnitz, . . . . .	100
Fleitmann's copper assay, . . . . .	100
Heine's colorimetric copper assay, . . . . .	101
Volumetric method with cyanid of potassium, . . . . .	101

---

SILVER ASSAY.

Classification of the silver assay, . . . . .	103
Dry silver assay, . . . . .	103
Volatility of silver, . . . . .	103
Absorption by the cupel, . . . . .	104
Wet silver assay, . . . . .	105
Classification, . . . . .	106

SECTION I.

SILVER ASSAYS IN THE DRY WAY, . . . . .	107
I. Assays for ores and metallurgical products that are not alloys, . . . . .	107
Scorification assay for ores rich or poor in silver, . . . . .	107
Two periods, . . . . .	107
Mixing of the Assay, . . . . .	107
Scorification, . . . . .	109
Theory, . . . . .	112
Action of litharge on various sulphids, . . . . .	112

	PAGE
Examples, . . . . .	116
Cupellation, . . . . .	119
Fusion assay for poor plumbiferous silver ores, . . . . .	125
Fusion assay for poor pyritiferous ores and products, . . . . .	127
Theory, . . . . .	127
Fusion assay for poor, earthy substances, . . . . .	132
1. Oberharz method, . . . . .	132
2. Assays for plumbiferous products, . . . . .	133
3. Scorification assay, . . . . .	134
4. Wet way, . . . . .	134
5. Concentration smelting, . . . . .	135
II. Assays for argentiferous alloys, . . . . .	135
Metallic alloys, the principal part of which is lead or bismuth, . . . . .	135
Argentiferous tin and zinc, . . . . .	136
Argentiferous iron, pig iron, and steel, . . . . .	136
Metallic alloys which contain mercury, . . . . .	137
Alloys of silver and copper, . . . . .	137
1. "Argentiferous copper," . . . . .	138
2. "Cupriferous" or "alloyed silver," . . . . .	139
Preliminary assay, . . . . .	139
Strict assay, . . . . .	143
Cupel absorption, . . . . .	149
Alloys of silver and gold, and of silver and platinum, . . . . .	151

## SECTION II.

SILVER ASSAYS IN THE WET WAY, . . . . .	151
Gay Lussac's volumetric method, . . . . .	151
Origin of this method, . . . . .	151
Process, . . . . .	151
Other assays, . . . . .	164
Additional remarks upon the silver assay, . . . . .	165
Methods for the avoiding of considerable differences in the amount of silver given by powders that are specifically light, . . . . .	165
Loss of silver in connexion with the quantity of lead to be used in the cupellation, . . . . .	165
Gay Lussac's silver assay, . . . . .	166
