PREFACE.

THE number of communications I have received from medical men at home and abroad since the publication, in the *British Medical Journal*, of this lecture, has led me to believe that its reproduction in a separate form might be acceptable to the profession.

I am also glad to have the opportunity of correcting some errors and making several important textual and illustrative additions which, it is to be hoped, may render my method of reposition more intelligible and practicable.

UPPER WIMPOLE STREET,
LONDON, W.
