TABLE OF CONTENTS.

	Pages
Preface to the American Edition.....	5
Preface to the French Edition.....	11
Introduction to the French Edition.....	13
Advertisement of the French Translator.....	17
Note upon the Temperature of China.....	23
CULTIVATION OF MULBERRY TREES.....	27
General remarks.....	27
Different species of the mulberry.....	28
Manner of obtaining the best seed in order to reproduce the mulberry.....	31
Observations relative to the choice of mulberry plants.....	33
On sowing the seed of the mulberry.....	33
Method of transplanting dwarf mulberry trees.....	38
The favorable season for planting.....	41
Manner of raising mulberry trees.....	42
Of planting branches.....	44
Of pruning large mulberry trees.....	46
Method for sowing the seed of the mulberry.....	49
For planting dwarf mulberry trees.....	51
For planting mulberry trees in Autumn.....	54
For obtaining layers.....	56
For transplanting mulberry trees that are obtained from layers....	56
Planting mulberry branches upon beds of earth.....	58
SUPPLEMENT to the cultivation of mulberry trees.....	67
Grafting of mulberry trees.....	67
Cleft grafting.....	69
Budding or inoculation.....	71
Manner of grafting small stocks.....	72
THE RAISING OF SILK WORMS.....	77
Preliminary observations.....	77
Testimony from Chinese authors.....	77

	Pages
Construction of the silk worms' apartments.....	85
Construction of the oven.....	89
ON BATHING the eggs of silk worms.....	95
Different kinds of silk worms.....	96
Same subject.....	98
Preparation of the eggs to obtain a simultaneous hatching.....	99
Diseases the silk worms contract while they are in the egg.....	101
Hatching of the silk worms.....	105
Means of hastening or retarding the hatching.....	106
Choice of cocoons to obtain good eggs.....	106
Food for the silk worms.....	113
Feeding of the silk worms of four moultings.....	113
Of the autumnal worms.....	115
Preparation of the powder of leaves.....	115
The flour of small green peas that is spread on the leaves after the third moulting.....	116
Manner of feeding the hatching silk worms.....	116
Advantages of the raising in twenty-five days.....	116
Method for curing the silk worms of the heating they experience after the last moulting.....	118
Necessity of cutting the leaves in thin shreds for the young silk worms, and of spreading it upon them with a sieve.....	120
Method for diminishing the food, and hastening the moulting.....	120
Injurious things to the silk worms.....	121
Manner of feeding the silk worms according to their different ages.....	123
The heat that is good for them, is the interval from one moulting to another.....	124
The powder of mulberry leaves that is spread on the new leaves lightly moistened.....	125
Method for hastening the changes of color in the slow worms, and disposing them to moult at the same time with those that are more advanced... ..	125
Another manner of feeding the silk worms according to their different ages, and according to the changes of color they experience in the interval of each moulting.....	126
Quality of leaves that are good for the silk worms.....	127
Necessity of varying the temperature of the silk room according to the different ages of the silk worms.....	128
Of raising the temperature when the silk worms have ascended the leaves and are disposed to eat.....	129
Distribution of the silk worms on the hurdle, and the space to be allowed them.....	130

CONTENTS.

3

	Pages
TRANSPORTATION of the silk worms.....	130
Cause of the disease, called in Europe <i>muscardine</i>	131
Proceedings to separate the silk worms from the dirt and litter, and to pre- serve them from the diseases that cause their fermentation.....	132
REMOVAL of the silk worms after their first moulting.....	134
After their second moulting.....	134
After their third moulting.....	134
ENTRANCE of the silk worms in the cocoon room.....	137
Construction of the frames.....	137
How to warm them.....	137
Another method.....	138
Diseases of the silk worms in the cocoon room.....	140
ROUND COCOON ROOMS used in the south of China.....	141
Production of silk much more considerable in the north than in the south of China, see page 147 line 8.....	143
OBLONG COCOON ROOMS used in the north of China.....	146
Advantages and inconveniences of the round and oblong cocoon rooms...	147
Cocoon room recommended by the author.....	147
CHOICE OF THE COCOONS.....	149
How to preserve the cocoons.....	149
How to select those for re-production.....	150
Manner of killing the chrysalides.....	152
Different methods of killing the chrysalides.....	153
Earthen jars used for keeping the cocoons.....	154
SUPPLEMENT to the Chinese treatise on the raising of silk worms.....	157
Eggs of silk worms.....	157
Bathing the eggs of silk worms.....	158
Precaution for preserving the eggs.....	159
