PREFACE

TO THE SUPPLEMENTARY VOLUME

WHEN it was discovered that owing to a bibliographical obscurity we had omitted the later portions of Huxley's "Survey Memoir" on fossil fishes from our collection, it became necessary to issue a supplement containing the important work which we had inadvertently passed over. The opportunity is taken to add three interesting essays by Huxley, which, though not altogether of the same character as the memoirs containing original discoveries of which this collection otherwise consists, yet have considerable interest for zoologists, and are not contained in the published edition of his more general essays.

E. RAY LANKESTER.

January, 1903.
