PREFACE.

THE present work is a sequel to a publication by the writer, in the year 1851, entitled "The Philosophy of the Mechanics of Nature, and the source of Natural Motive-Power." It is designed to eliminate and arrange in due order the rudimentary facts and principles therein detailed, and to show their harmony with the Laws that control the Material Universe.

This has necessarily involved further researches into the origin of Molecular Forces, of Gravitation, and also of Solar Light and Heat, as immediate sources of Natural Motive-Power.

The results are now respectfully submitted to the reader.

PROVIDENCE, R.I., September, 1879.

CONTENTS.

CHAPTER I.

INTRODUCTION	PAGE I
------------------------	-----------

Definition of Gravitation.—Vague Conjectures of Philosophers.—Cause of Mechanical Motion of Matter immaterial.—“Incapability of Matter at Rest to put itself in Motion.”—Transmission of mechanical Force by passive Matter.—Original Knowledge of the Properties of Matter obtained by experimental Investigation.—The Inductive System.—Discordance of Mechanical, Chemical, and Materialistic Doctrines of the original Cause of Motion of Matter.—Real Source of natural Motive-Power.

CHAPTER II.

THE MOMENTUM OF THE PLANETS A SOURCE OF NATURAL MOTIVE-POWER.—ESTIMATES OF PLANETARY FORCES, MAGNITUDES, AND REVOLUTIONS	12
--	----

Multitudes of Suns and Worlds.—Orbital Momentum of the Earth.—Swift Motion of Planets.—Table of comparative Magnitudes and Velocities of Planets.—Popular Ideas of the Reasons for the Revolving Movements of the Planets; as for producing Day and Night for Animal Refreshment, Seed-time and Harvest.—Utilization of an universal Electric Ether for diffusing the Impulses imparted to the swiftly revolving Planets.—The Phenomena of the Movements of Matter on the Earth's Surface are producible by the mechanical Impulse imparting Rotation to one Cylinder of a Holtz's Electrical Machine opposite to the other; a Movement analogous to the Rotation of the Earth opposite to the Globe of the Sun.—Electric Vibrations of Nerves.

CHAPTER III.

	PAGE
ALL SPACE, NOT OCCUPIED BY OTHER MATTER, IS OCCUPIED BY A UNIVERSALLY DIFFUSED AND INVISIBLE ELECTRIC MEDIUM	23

Original Discovery of the Existence of the Electric Ether. — It is the general Medium for transmitting Mechanical Impulses. — No void Space in the Universe. — The minute Spaces between Atoms pervaded by the Electric Ether. — Every Movement of Molecules and Bodies in the electric Medium disturbs its State of Rest, and produces its Motion either in *Vibrations*, or *Currents*. When these pass through the conducting sensorial Nerves of the Eye to the Brain, the Effect is recognized as *Light*; when through Nerves of feeling in the Body, it is recognized as *Heat*. The Movement of a metallic Disc near a Disc of Sealing-wax excites such dazzling bright Sparks as to have obtained for this Apparatus the descriptive Name of Electrophorus, "Sunshine Producer." — All kinds of Electrical Machines produce Movements of the Electric Ether, by putting in Motion grosser tangible Bodies, commonly Cylinders, Globes, or Magnets arranged to revolve about an Axis, like the Planets. — Swift rotating metallic Plates of soft Iron: they cut tempered Steel.

CHAPTER IV.

THE PERFECT REGULARITY OF THE DAILY ROTATION OF THE EARTH SERVES AS THE STANDARD MEASURE OF TIME, SPACE, WEIGHT, QUANTITY OF MATTER, AND MECHANICAL FORCE	39
---	----

Sub-divisions of Time. — Length of a Day. — Length of a Pendulum. — Rotation of the Earth. — The Foot-pound. — A Horse-power. — Equivalent of Heat in Foot-pounds.

CHAPTER V.

POPULAR THEORIES AS TO THE SUN	42
--	----

Theory of the Combustion of Gases, — of pounding Meteors, etc. — The Sun travelling through Space. — The Sun composed of elementary Substances similar to those of the Earth, as established by the Spectrum Analysis. — Thirty-one terrestrial Metals known to exist in the Sun.

CHAPTER VI.

	PAGE
THE EXCITING CAUSE OF SOLAR LIGHT AND HEAT TRACED TO THE MECHANICAL FORCE OF THE REVOLVING HEAVENLY BODIES	46
<p>Circulating Currents about the Earth excited by its daily Rotation convert it into a great Electro-magnet. — The other Planets of our System are similarly excited. — The Sun, seven hundred-fold greater than all the Planets, also excited by a swift Rotation on its own Axis; thus they are all polarized. — Electric Currents around the Sun. — Intense electric Excitation of the Solar Electro-sphere; analogous to the <i>Aurora Borealis</i>. — Openings at Times through the Electro-sphere, constituting "Spots on the Sun." — Extent and effects of Solar Spots; their Relation to the Movements of Compass-needles. — Planets are Electro-Magnets. — The Sun a Centre of Reaction; Analogy of the "Calcium Light." — Stellar Suns also Centres of Reaction. — Each Sun represents the Action on the Electric Ether of all the Planets circling around it. — Heat carried off by Electric Currents. — Faraday's Metallic Chamber. — The Sun as a bright and cheerful Dwelling-place. — So long as the Planets revolve, the Sun will shine.</p>	

CHAPTER VII.

ARTIFICIAL EXCITATION OF LIGHT BY MAGNETO-ELECTRIC MACHINES	55
<p>The excitation of Light by revolving Magnets strictly analogous to its natural Excitation by the revolving magnetic Planets. — Magneto-electric Lighthouses in England and France. — Effects of Electric Light equal to those of Sunshine. — Mechanical Difficulties of Adjustment. — Amount of Motive-power required. — Conversion of Motive-power into Light and Heat. — Extent of Electric Light measured by mechanical Force. — The Solar System a sublime Magneto-electric Machine.</p>	

CHAPTER VIII.

THE SENSORIAL NERVES CONSIDERED AS INSTRUMENTAL TESTS OF PHYSICAL SCIENCE	59
<p>The Sensorial Nerves modify Solar Reaction. — The Signals they transmit unintelligible to the new-born Child. — Colors, Odors, Flavors. — Inattention to the true Functions of the Nerves a serious Obstacle in the Way of Knowledge. — Causes and Effects</p>	

	PAGE
blended. — Table of different Names given to the same Electro-Mechanical Action transmitted through the five Sensorial Nerves. — Imponderable Agents of Nature, so called. — The Optic Nerves Tests of Heat.	
CHAPTER IX.	
CORRESPONDING VIBRATIONS TRANSMITTED BY THE ATMOSPHERIC AND THE ELECTRIC ETHER	63
These are illustrated by the Telephone. — Also by the Voice and Musical Sounds. — Vibrations conveyed by Lenses. — Light and Sound perpetually transmitted. — The differences in Colors and in Musical Tones due to a varied Rapidity of Vibrations. — Extent of Vibrations recognizable by the Ear. — Prismatic Colors. — Table of Vibrations in Chromatic Scale of Colors. — The cessation of Vibrations of the Electric Ether results in Silence, Darkness, and Cold.	
CHAPTER X.	
CONVERTIBILITY OF VIBRATIONS OF HEAT INTO ELECTRIC CURRENTS	68
Classified as Thermo-Electricity. — A Magnetic Needle is more sensitive than a Thermometer. — The metallic Bars of a Thermo-Electric Battery, with Ice applied to one End and a hot Body to the other, represent the Conditions of the Polar and Equatorial Regions of the Earth, exciting the flashing Auroral Currents. — Vibration of Molecules of Mercury in Tubes of Thermometers produces Expansion as a Test of Temperature.	
CHAPTER XI.	
POPULAR DOCTRINES OF ELECTRIC AND MOLECULAR VIBRATION, DENOTED HEAT	78
Existing scientific Opinions as to Heat. — Mr. Tyndall gives no Solution. — Ideas very unsettled. — A Warfare of Molecules. — "Wild Stone Avalanches." — Table of Dynamic Action of Molecules. — Continual Vibration of Molecules. — Diffusion of the Momentum of the Solar System by Electric Currents and Vibrations. — Rotation of Planets excites Currents. — Currents counteract Vibrations. — Examples of Currents used to produce a Vacuum. — The Sun induces Vibrations and causes Rectangular Motion.
