## PREFACE.

---

THE opening chapter of this book—the chapter of general exposition—has been adopted and issued by the Independent Labour Party as a statement of the Socialist position. There is much confusion in the public mind about Socialism. The word is flung about indiscriminately by politicians as a mere term of abuse. That is for the moment the favourite method of making faces at their opponents adopted by the ruck of political partisans with whom that sort of thing passes for the discussion of public affairs. As against that prevalent imbecility, this book is intended to provide a clear and definite reasoned statement of the essential teaching of Socialism.
